IOWA UNIFORM CRIME REPORTS

1980

ANNUAL REPORT

IOWA UNIFORM CRIME REPORTS

1980

ANNUAL REPORT

SUMMER, 1981

Prepared by The Iowa Department
of Public Safety
Research and Development Bureau

IOWA DEPARTMENT OF **public ★ safety**
DPS

ROBERT D. RAY
GOVERNOR

WILLIAM D. MILLER
COMMISSIONER

Summer, 1981

This is the fifth annual Iowa Uniform Crime Reports prepared and released by this Department. This year's report differs significantly from previous ones in that it is condensed into one volume rather than two. The statewide analysis of reported crime statistics is retained in this volume, along with crime, arrest, and clearance statistics as reported by local law enforcement agencies. Also, included in this report is the statewide analysis of assaults on peace officers.

A supplemental report will be issued later this year containing jurisdictional comparisons of crime and clearance rate data, and statewide analysis of arrests and clearance rates, which were previously contained in Volume I of the annual crime report.

A reorganization of this report has significantly reduced the cost of its production and has enabled a more timely release of annual crime statistics than has been possible in past years.

My sincere thanks and appreciation goes to the 225 local law enforcement agencies contributing statistics for this report. The excellent cooperation we have received from local departments has again greatly facilitated the preparation of this report.

Sincerely,

William D Miller
WILLIAM D. MILLER
Commissioner

OFFICE OF THE COMMISSIONER • 515/281-5261 • WALLACE STATE OFFICE BUILDING • DES MOINES, IOWA 50319

INTRODUCTION

Background

The 65th Iowa General Assembly enacted into law Chapter 749B of the Iowa Code requiring law enforcement agencies to submit reports of crime and arrests to the Bureau of Criminal Investigation. The following is a reprint of a portion of this law (now Section 692.15 of the Code) concerning Uniform Crime Reports.

> When it comes to the attention of a sheriff, police department or other law enforcement agency that a public offense has been committed in its jurisdiction, it shall be the duty of the law enforcement agency to report information concerning such crimes to the bureau on a form to be furnished by the bureau not more than thirty-five days from the time the crime first comes to the attention of such law enforcement agency. These reports shall be used to generate crime statistics. The bureau shall submit statistics to the governor, legislature, and crime commission on a quarterly and yearly basis.

During December 1974, the Iowa Bureau of Criminal Investigation, assisted by the Federal Bureau of Investigation, conducted schools throughout the State in the proper completion of Uniform Crime Reports. The schools were attended by most law enforcement agencies that were to contribute Uniform Crime Reports. On January 1, 1975, the Iowa Uniform Crime Reporting program was implemented, with forms being sent to 210 agencies. Forms provided by the Federal Bureau of Investigation were used in implementing this program since most contributing agencies had previously submitted these forms to the FBI. Monthly reports were received from 209 agencies throughout 1975 and 1976. In 1977, the number of agencies submitting reports grew to 220, which remained the case in 1978. In 1979, the number of reporting agencies rose to 223, and in 1980, to 225.[1] Since 1977, all reporting agencies have submitted complete data.

---

[1] The two agencies added in 1980 are Madrid and Waukee.

In 1977 the responsibility for Uniform Crime Reports was transferred from the Bureau of Criminal Investigation to the Department of Public Safety's Administrative Services Division (which maintains UCR field personnel, receives raw data from contributing agencies, and performs computer analysis of data) and the Research and Development Bureau (which further analyzes data, prepares the quarterly and annual reports, and responds to information requests). Questions concerning this report or addressing the topic of crime in Iowa should be addressed to the latter.

Method of Reporting

Iowa sheriffs' offices and police departments each month report the offenses, arrests, and clearances known to them within their jurisdictions. Crimes handled by State and Federal agencies are reported by the local jurisdictions in which the crimes have occurred. County sheriffs report activity occurring outside the jurisdictions of direct contributing police departments. With few exceptions, those police departments which contribute directly are in communities having populations of 2,500 or greater. The following table indicates the number of direct reporting agencies in each category.

TABLE I
Number of Reporting Agencies by Type, 1980

Agency Type	Number
Sheriff's Offices	100
Police Departments	122
Regents' Universities	3
Total Direct Reporting Agencies	225

Offense Classifications

The Iowa Department of Public Safety forwards Iowa crime figures to the Federal Bureau of Investigation for development of nationwide statistics. Because the national program receives reports from law enforcement agencies throughout the nation, uniformity of classification and reporting procedures are necessary to overcome variations in the definitions of criminal offenses among states. For this reason, UCR definitions do not necessarily conform to the definitions set forth in the Code of Iowa.

The criminal offense information contained in the Uniform Crime Reports is divided into Part I and Part II Crimes. Part I Crimes are generally those crimes that are considered most serious in nature, occur with regularity, and are most frequently reported to law enforcement agencies. For the purpose of analysis, Part I Crimes are further divided into violent and property crimes:[2]

Violent Crimes

Murder - the willful, non-negligent killing of one human being by another.

Forcible Rape - the carnal knowledge or attempted carnal knowledge of a female forcibly and against her will.

Robbery - the taking or attempting to take anything of value from the care, custody or control of a person or persons by violence or by putting the victim in fear.

Aggravated Assault - an unlawful attack or attempt by one person upon another for the purpose of inflicting severe or aggravated bodily injury.

Property Crimes

Burglary - Breaking or Entering - the unlawful entry or attempted entry of a structure to commit a felony or a larceny.

Larceny (except motor vehicle thefts) - the unlawful taking of property from the possession or constructive possession of another.

---

[2] These are also frequently called "crimes against persons" and "crimes against property", respectively. Further explanation of crime categories and scoring of offenses can be obtained in UCR publications of the Federal Bureau of Investigation.

Motor Vehicle Theft - the theft or attempted theft of a motor vehicle. Farm equipment, construction equipment, boats, and airplanes are specifically excluded from this category and are included under larceny.

Arson - the willful or malicious destruction or attempted destruction of property by fire.

The inclusion of arson in the Part I category, starting in 1979, necessitated a distinction between index crime and Part I crime. Figures for "index crime" include the seven categories of murder, rape, robbery, aggravated assault, burglary, larceny, and motor vehicle theft, but not arson. This allows for comparisons of the index crime rate with previous years.

Part II crimes are all those not included in the Part I cagetory. Figures for Part II crimes reported to police are not provided in the UCR system, as is the case for Part I crimes. Arrests for Part II crimes are included; however, most reports of crime deal exclusively with Part I crimes, and these require primary attention here. In order to maintain comparability with prior years, arson arrests continue to be included in the Part II category.

Organization of This Year's Report

The organization of this report has undergone a major change from prior years. This volume, the Annual Report, contains statewide analysis of data on reported Part I crimes and on assaults on peace officers. This information was contained in Chapters II and V of Volume I of prior years' crime reports, and constitutes Part I of this volume. In addition, Part II of this report presents computer printouts prepared by the Data Services Bureau of the Department of Public Safety. These printouts contain, in tabular form, compilations of the raw data received from contributing agencies in 1980, and formerly constituted Volume II of the annual release.

A second volume, the Supplemental Report, will be released this fall. It will contain statewide arrest and clearance data, demographic analysis of data, and jurisdictional comparisons of reported crimes, crime rates, and clearance rates. This is the material that was contained in Chapters III and IV of Volume I of previous years' reports.

Methodology

Contributing agencies submit monthly crime reports to the Department of Public Safety usually within approximately ten days of the end of the month. In instances in which incomplete or erroneous reports are received, corrected reports are normally submitted within approximately one month following the month in question. The Data Services Bureau monitors agency submissions and exerts considerable effort to achieve 100% reporting.

In the case of past annual reports, estimations have been developed for agencies for which complete data have not been received for a given year, with estimates based whenever possible upon the monthly reports which have been provided. No estimations have been required since 1976, as all agencies reported in each month during each of the past three years.

Upon receipt of the 1980 annual printout, the Research and Development Bureau of the Department of Public Safety commenced analysis of the data. Initial steps involved inspection of the data to locate inaccuracies which might necessitate alteration of figures. Because of the excellent performance of the Data Services Bureau, little alteration was necessary.

Since the bulk of this report is made up of tables, considerable effort has been made 1) to make the tables understandable, 2) to put them in the most logical format, and 3) to make them useful to local law enforcement officials and others who might find them of use. Liberal use has been made of graphs to visually portray the more significant results in the tables.

To assist understanding of some of the tables shown here, the following definitions are presented:

Standard Metropolitan Statistical Areas (SMSAs) - areas including a core city of at least 50,000 population, and frequency consisting of additional smaller surrounding jurisdictions. Johnson County with Iowa City designated as the core city is also a SMSA.

Suburban Cities - cities of less than 50,000 population in Standard Metropolitan Statistical Areas, other than Iowa City.

Suburban Areas - all jurisdictions (including the sheriff) within a SMSA with the exception of the core city.

Rural Areas - those areas in non-SMSA counties which are served by the county sheriff or other agencies which do not report directly to the Uniform Crime Reporting system.

Suburban Sheriffs - county sheriffs in SMSA counties.

Non-Suburban Cities - all cities outside of SMSAs.

University Police - university campus security departments reporting immediately to local city police. For 1980, this category includes the State University of Iowa, Iowa State University, and the University of Northern Iowa. In 1977, only Iowa State University was included. The State University of Iowa was added in 1978, and the University of Northern Iowa in 1979.

Factors Related to Crime

Caution should be exercised in making direct comparisons to crime and arrest data reported to different law enforcement agencies. Crimes reported relate to events while arrests relate to persons. A single reported offense may involve several crimes, several offenders, and several victims. Many arrests may involve only one such offense. Listed below are some additional conditions which can affect the crime and arrests that occur in different jurisdictions. The same conditions may also affect the amount and type of crime reported.

1. Density of population and geographic size of community.
2. Composition of the population with reference particularly to sex, age, and race.
3. Economic status and mores of the population.
4. Mobility of the population.
5. Climate.
6. Educational, recreational, and religious characteristics.
7. Policies, effective strength, and standards governing appointment to law enforcement agencies.
8. Policies of the prosecuting officials, courts, and correctional agencies.
9. Attitudes of the public toward crime and law enforcement agencies.
10. The degree to which law enforcement agencies adhere to crime reporting standards.

Limitations of this Report

Limitations of the Uniform Crime Reporting System have been debated extensively. Relying primarily on the reports of citizens, the figures included in Uniform Crime Reports reflect wide variations in the tendency of citizens to report crimes. Citizens may not report all crimes to law enforcement agencies, believing that there is nothing the police can do, fearing retaliation from offenders or embarrassment in revealing their own involvement in the offense or in other crimes.

The degree to which crimes are reported by citizens varies considerably from offense to offense and from area to area. Based on victimization survey studies completed in metropolitan areas, the percentage of actual crimes reported to law enforcement agencies is related to such factors as:

1. the seriousness of the crime and/or value of goods lost;
2. the victim's perception of the likelihood of apprehending the suspect;

3. the presence or absence of insurance on property.

Data from victimization surveys indicates that reporting rates may be as low as one in five for some crimes (e.g. larceny). Thus, the Uniform Crime Reports do not contain a complete accounting of crime within jurisdictions. However, the UCR system constitutes the best network of State and national crime figures currently available.

The UCR system has been developed to serve as a tool to assist jurisdictions obtain comparative information which can assist in allocation of personnel, budgeting, deployment of resources, and the like. Under ideal circumstances, the system can be of great benefit to criminal justice agencies, other public and private agencies, and to citizens.

The inadequacy of record-keeping systems was a likely source of inaccuracy in uniform crime reporting in past years. Within the past decade, dramatic improvements in law enforcement record-keeping and reporting systems have occurred which have likely had a considerable effect on the amount of crime reported within some jurisdictions. While major metropolitan areas were in the forefront of this improvement -- obtaining sophisticated computer systems to record and keep track of crimes reported -- since the development of the Iowa UCR system, the most notable changes have been observed in some of the smaller jurisdictions, particularly in rural areas. It is in these areas that crime typically has not been a major problem and that the necessity for accurate record-keeping has in the past been least apparent.

Although conclusive information on the subject is not available, it is possible that at least a portion of the increase in crime reported during the past few years is due to improvements in record-keeping, particularly in the rural areas. Further, because these rural jurisdictions started with low levels of crime -- both in raw numbers and rate per population -- large percentage increases can take place without great numerical increases.

Changes in crime rates can be affected by fluctuations which may be due to improvements or deterioration in record-keeping or to probability. Statistical theory indicates that the smaller the number in a sample - e.g., the smaller the number of reported crimes in a jurisdiction in a given year - the more susceptible the same is to great variation in mean (average) and standard deviation. What this means, in layman's terms, is that the reported crimes in smaller jurisdictions will vary more from year to year -- without necessarily indicating a trend -- than will reported crimes in larger jurisdictions containing more crime.

PART I

STATE LEVEL ANALYSIS

REPORTED CRIMES

ASSAULTS ON PEACE OFFICERS

INDEX OFFENSES REPORTED BY POPULATION CATEGORY 1980

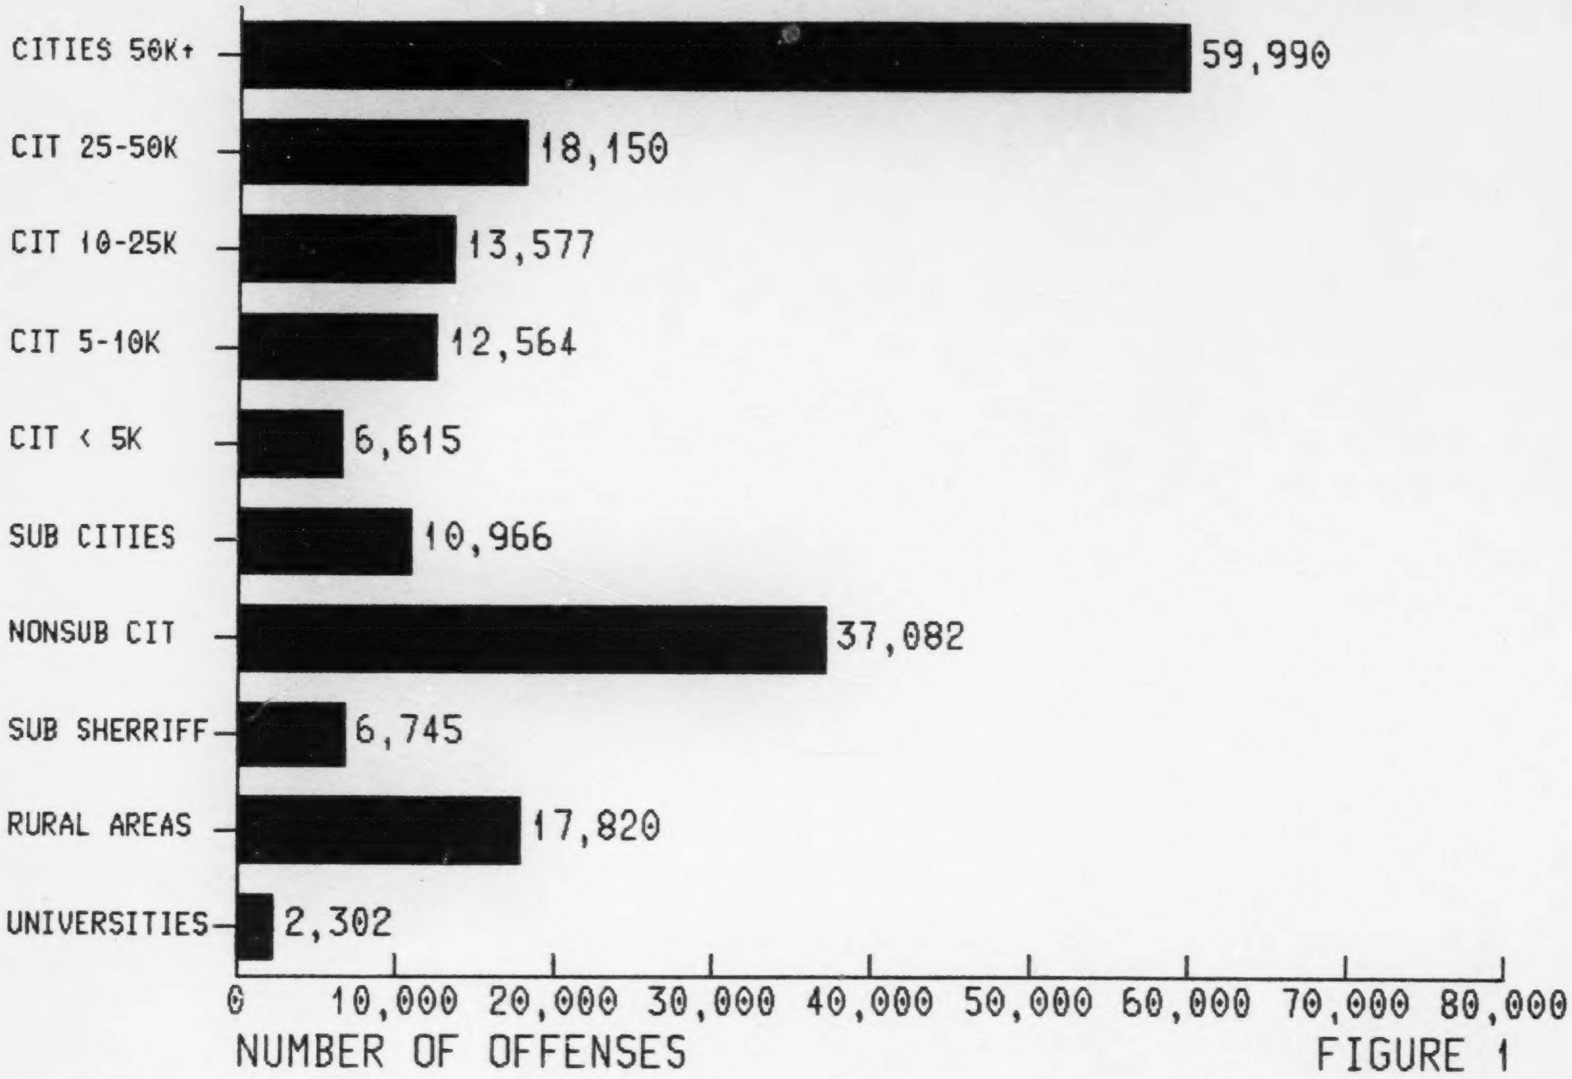

FIGURE 1

I. TOTAL INDEX CRIMES REPORTED AND TOTAL INDEX CRIME RATE

There were 137,763 index crimes reported to Iowa law enforcement agencies in 1980, compared to 124,873 in 1979. This is an increase of 10.3%. Both violent and property crime increased. Reported violent crimes rost 10.7% from 5,258 in 1979 to 5,822 in 1980 while property crimes increased from 119,615 to 131,941 or 10.3%.

Table II presents information of offenses known to law enforcement agencies for each category of index crime in 1980 by population categories. A breakdown of total index crimes reported by population categories is visually depicted in Figure 1. The data shows that a substantial majority of the reported crime in Iowa during 1980 (80.5%) occurred in the cities, with only 12.9% being reported from the State's rural areas. The eight metropolitan areas accounted for 58.5% of the total while other cities accounted for 26.9% of the statewide total of reported index crime.

Looking at the State's crime rate, there were 4,728.6 index crimes reported for 1980 per 100,000 population. This was an increase of 9.9% from the corresponding figure for 1979 of 4,301.2 offenses per 100,000 population. The violent crime rate rose 10.3% from 181.1 to 199.8 offenses per 100,000 population, wile the property crime rate rose 9.9% from 4,120.1 to 4,528.8.

TABLE II

OFFENSES KNOWN
BY POPULATION CATEGORY
1980

Population Categories	Crime Index	Violent Crime	Property Crime
State of Iowa	137,763	5,822	131,941
Total for all Cities	110,896	4,967	105,929
SMSAs	80,559	4,278	76,281

Figure 2 visually portrays the total 1980 crime rate by population grouping. It shows that, generally speaking, the larger the city, the higher the crime rate. This is in line with findings for earlier years. Rural areas have the lowest crime rate of all population groupings, which is also a pattern continued from past years.

Table III shows crime rates by population groupings for each category of index crime, along with corresponding percentage changes between 1979 and 1980.

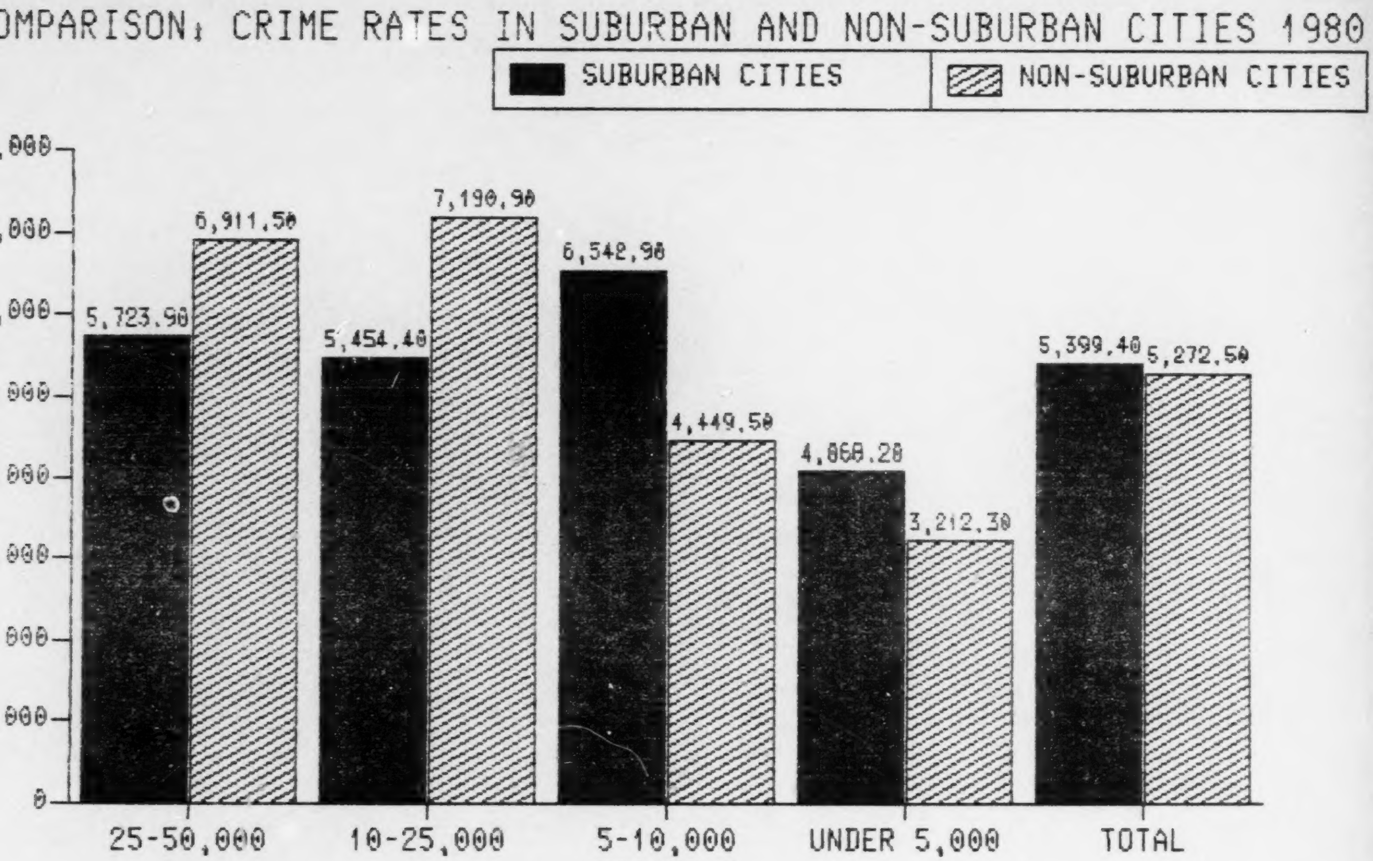

FIGURE 3

Figure 3 illustrates the relationship between rates of reported index crimes in suburban and non-suburban cities. In the two categories representing the larger cities, cities of 25,000 to 50,000 population and cities of 10,000 to 25,000 population, non-suburban cities had the higher crime rates.

However, in the other three categories, suburban cities had higher rates of reported index crime than did non-suburban cities of comparable size.

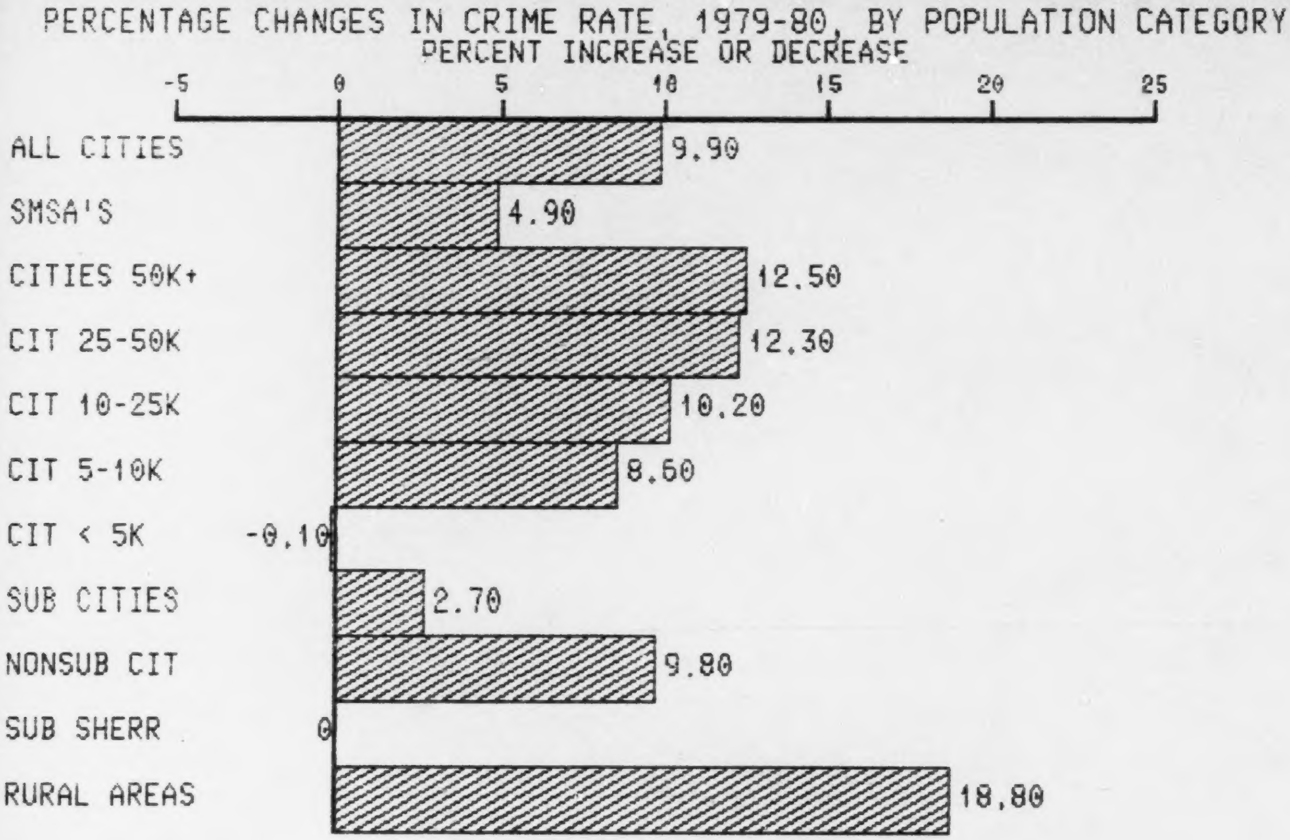

FIGURE 4

Figure 4 portrays changes in the total index crime rate for various population categories between 1979 and 1980, in percentage terms.

The largest percentage increase occurred in the State's rural areas, which, as mentioned earlier, continue to have the lowest crime rate. Percentage increases were experienced in the crime rate in all categories with the exception of cities of under 5,000 population and in suburban sheriffs' offices.

If we examine rates of violent crime shown in Table III, the relationship between the violent crime rate and population is somewhat similar to that for the total crime rate. The highest rate of violent crime in 1979 is found in the state's largest cities, with populations of 50,000 or more. This repeats the pattern found for the total crime rate, but the distinctiveness of large cities with regard to violent crime is more pronounced than for the total crime rate. Cities of 50,000 population and over experienced a rate of violent crime in 1980 more than twice as high as the state average.

Rural areas are especially distinctive in their low rate of reported violent crime. The violent crime rate for rural areas is less than one-sixth of the statewide average.

The following population groupings experienced declines in their violent crime rates between 1979 and 1980: all cities of 10,000 to 25,000 population, all suburban cities -suburban cities of 25,000 to 50,000 population, suburban cities of 10,000 to 25,000 population, suburban cities of under 5,000 people, and total suburban areas. All other groupings had increases.

The sharpest percentage increase in the violent crime rate was in suburban cities of 5,000 to 10,000 people, with a rise of 165.6%. All cities of 5,000 to 10,000 people experienced a 51.7% rise in the violent crime rate, while non-suburban cities under 5,000 people showed a 44.1% increase.

Looking at rates for each of the four types of violent crime, the patterns indicated in Table II are generally similar to those for total and violent crime rates. Cities of 50,000 and over had the highest rate in the state during 1980 for each of the four individual categories of violent crime: murder, rape, robbery, and aggravated assault.

There were several cases of extreme fluctuation in rates of murder and rape between 1979 and 1980. As noted in previous reports, conclusions based on these changes are likely to be misleading because of the relative infrequency with which these crimes occur.

The robbery rate increased 9.8% statewide between 1978 and 1979. The greatest percentage increase was in non-suburban cities under 5,000 population (123.5%). However, the relatively low frequency of robbery in these cities renders these changes of questionable statistical reliability. Contrary to the general statewide increase in the robbery rate during 1979, some population categories experienced declines. The largest percentage decrease was in suburban cities of 10,000 to 25,000 people (30.9%). Also notable were declines in the robbery rate for all cities of 10,000 to 25,000 people (15.8%), in all suburban cities (12.2%), and in suburban cities of under 5,000 people (11.5%).

A statewide increase of 8.9% in the rate of aggravated assaults was accompanied by corresponding increases for most population groupings. The largest percentage increase was experienced by suburban cities of 5,000 to 10,000 people (286.8%). Other large percentage increases in the aggravated assault rate occurred in the University category (65.3%), all cities of 5,000 to 10,000 people (56.6%), non-suburban cities of 10,000 to 25,000 people (49.1%), and suburban cities of 5,000 to 10,000 people (41.1%).

Because property crime made up nearly 96% of all Part I crime in Iowa in 1980, patterns of property crime shown in Table III are essentially parallel to those for the total crime rate. Again, cities over 50,000 had the highest rate of total property crime. This also holds for each of three individual property crimes: burglary, larceny, and motor vehicle theft.

The statewide burglary rate rose 16.7% in 1980. Rural areas showed the most substantial percentage increase of 22.4%. Conversely, the burglary rate declined by 3.2% in cities of under 5,000 population, and 10.5% on University campuses.

There was a 9.5% increase in the statewide larceny rate between 1979 and 1980. Larceny rates increased most dramatically in the rural areas of 19.8%. Decreases were experienced in cities under 5,000 (0.8%), in areas reporting through suburban sheriff's (0.9%), and in total suburban areas (0.8%).

The rate of motor vehicle thefts in Iowa decreased by 8.6% in 1980, with most population groupings paralleling this statewide trend. Exceptions were increases shown for cities of 10,000 to 25,000 people (5.3%), cities under 5,000 population (4.4%), suburban cities of 10,000 to 25,000 population (20.1%), suburban cities of 5,000 to 10,000 people (18.4%), non-suburban cities of 10,000 to 25,000 people (3.7%), non-suburban cities of under 5,000 population (17.5%), and universities (19.6%).

Figures 5 through 8 depict the distribution of reported index offenses statewide, in SMSAs, non-suburban cities, and rural areas in 1980. Larceny accounted for 68% of the reported index crime statewide, followed by burglary at 23%. This larceny and burglary made up between 90% and 93% of the reported index offenses in all four cases, although the relative proportions of the two offenses varied somewhat between population groups.

Violent crime accounted for less than 5% of Iowa's Part I crime in 1979. This finding also held for non-suburban cities and rural areas. In the SMSAs, violent crime was 5.3% of the total.

II. Monthly Offense Pattern and Offense Characteristics

A. Crime Index Totals

Figure 9 presents the monthly trend of total index offenses during 1979 and 1980, and indicates that the increase in crime in 1980 was reflected during each month of the year, except for October. The patterns were similar during the two years. In both years, the summer months experienced the greatest volume of reported crime. This seasonal pattern is frequently reflected in reported crime data.

The increase in reported violent index crime, as shown in Figure 10, experienced by Iowa in 1980 is reflected in figures for all except three months. In March, April, and October, 1980, there were fewer violent index offenses reported than in the same months in 1979. However, all other months in 1980 showed more reported violent crimes than occurred during the corresponding months of the prior year.

The monthly pattern of reported property offenses, which is shown in Figure 11, closely parallels the trend for all index crime, because of the predominance of property crime in the total crime index.

B. Characteristics and Dollar Value of Property Stolen

Figure 12 summarizes the type and value of property stolen in Iowa during 1980. There was $50,777,171 worth of property reported stolen during 1980, which is an increase of 13.2% from the 1979 total of $44,833,419.

As was true during the past years, the category with the greatest dollar loss in 1980 was locally stolen motor vehicles. The value of these was $15,402,203, which was 30.3% of the total value of property reported stolen in Iowa in 1980.

TOTAL INDEX OFFENSES BY MONTH, 1979 and 1980

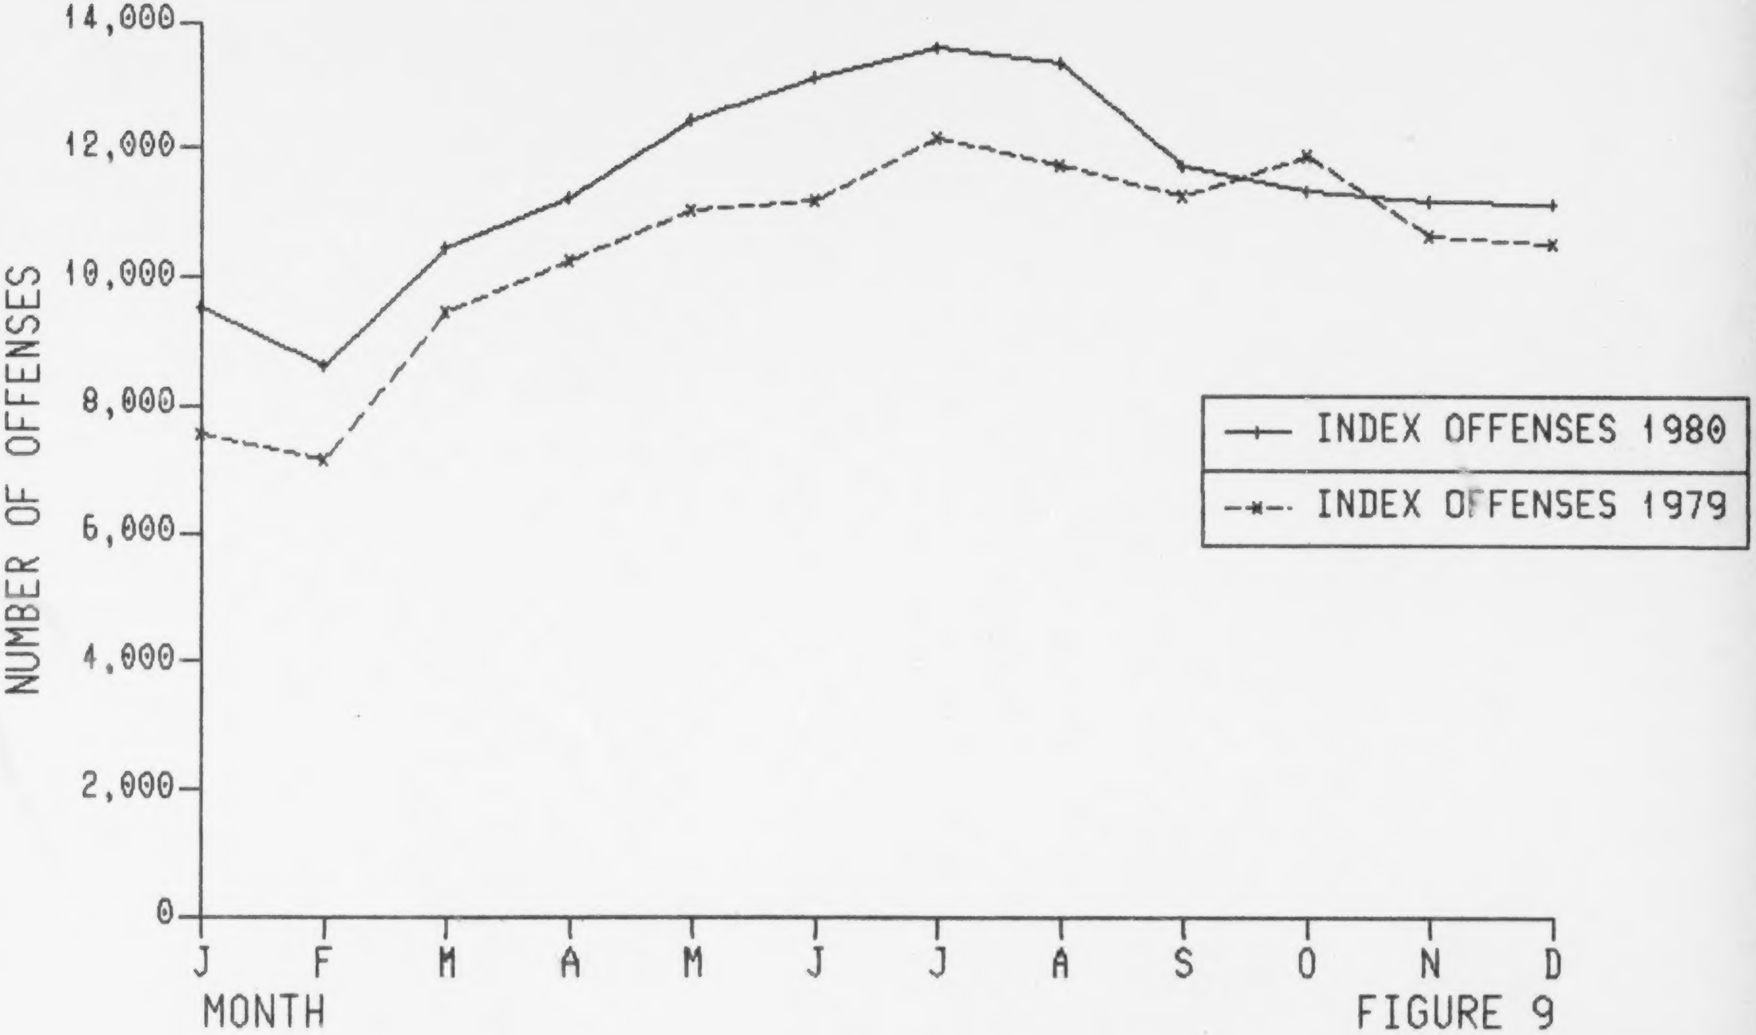

FIGURE 9

VIOLENT INDEX OFFENSES BY MONTH 1979 AND 1980

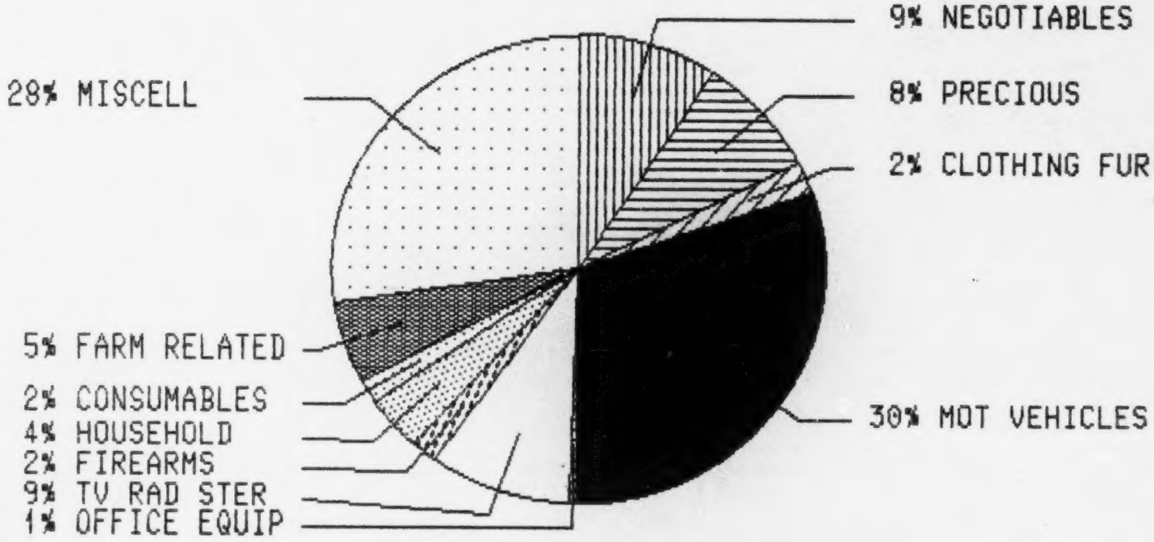
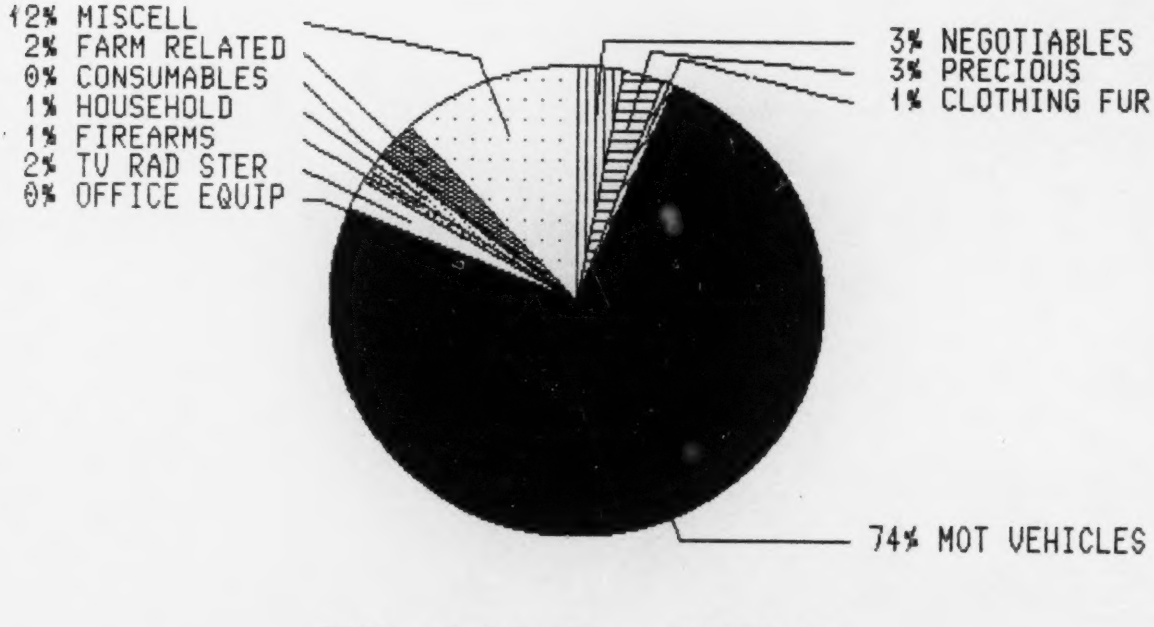
VALUE OF STOLEN PROPERTY 1980



TOTAL=$50,777,161 FIGURE 12

VALUE OF RECOVERED PROPERTY 1980



TOTAL=15,713,939 FIGURE 13

Figure 13 illustrates the distribution of the value of stolen property recovered during 1980. Again, stolen motor vehicles made up the largest single category, accounting for 74.5% of the value of the recovered property.

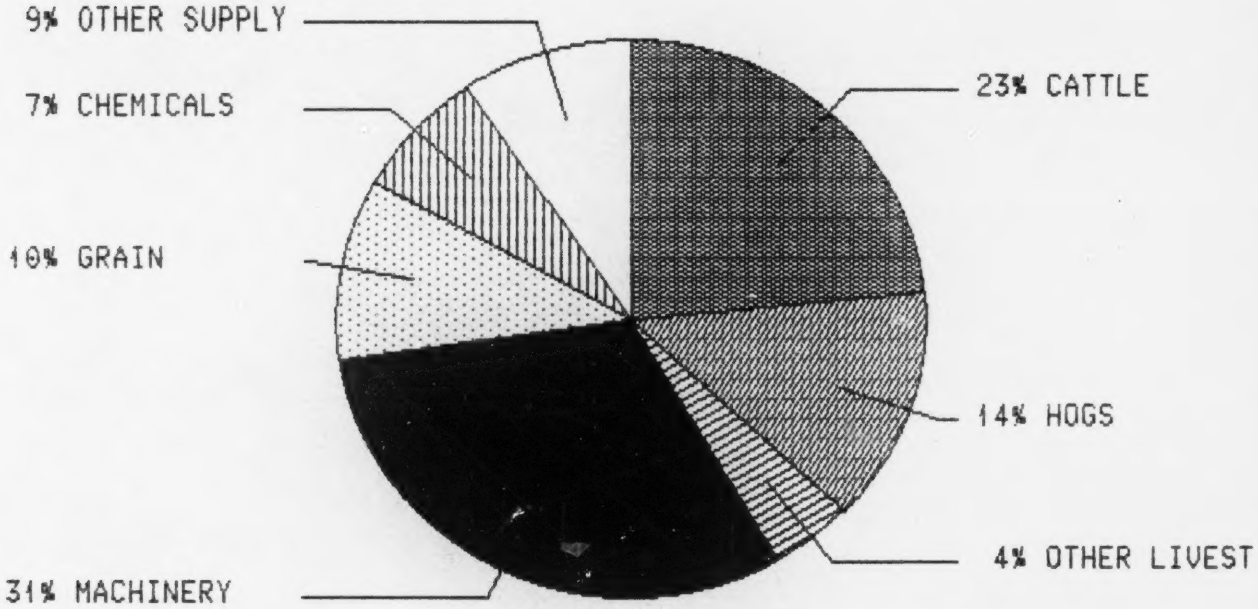
C. Farm-Related Theft

It is noteworthy, in view of Iowa's agricultural tradition, that the category "farm-related theft" shown in Figure 13, accounts for only 5.4% of the total estimated property loss from theft suffered by Iowans during 1980. More detail on the nature and location of farm-related theft is shown in Figures 14. Although farm-related theft represents a relatively small portion of the total dollar loss from theft suffered by Iowans during 1980, the critical position of agriculture in Iowa's economy enhances the significance of this loss.

As shown in Figure 14, nearly one-third of the dollar loss resulting from farm-related theft is accounted for by thefts of farm machinery. The estimated value of farm machinery reported stolen to Iowa law enforcement agencies during 1980 was $857,617 or 31% of the total estimated property loss from reported farm-related theft.

Thefts of livestock amounted to $1,149,671 of dollar loss during 1980. This was 41.6% of the total loss from farm-related theft. Cattle thefts accounted for $648,087 of estimated property loss, which is 56.4% of the dollar loss from livestock theft and 23.5% of the total dollar loss from farm related theft.

DOLLAR VALUE OF FARM-RELATED THEFT 1980



TOTAL=$2,763,218 FIGURE 14

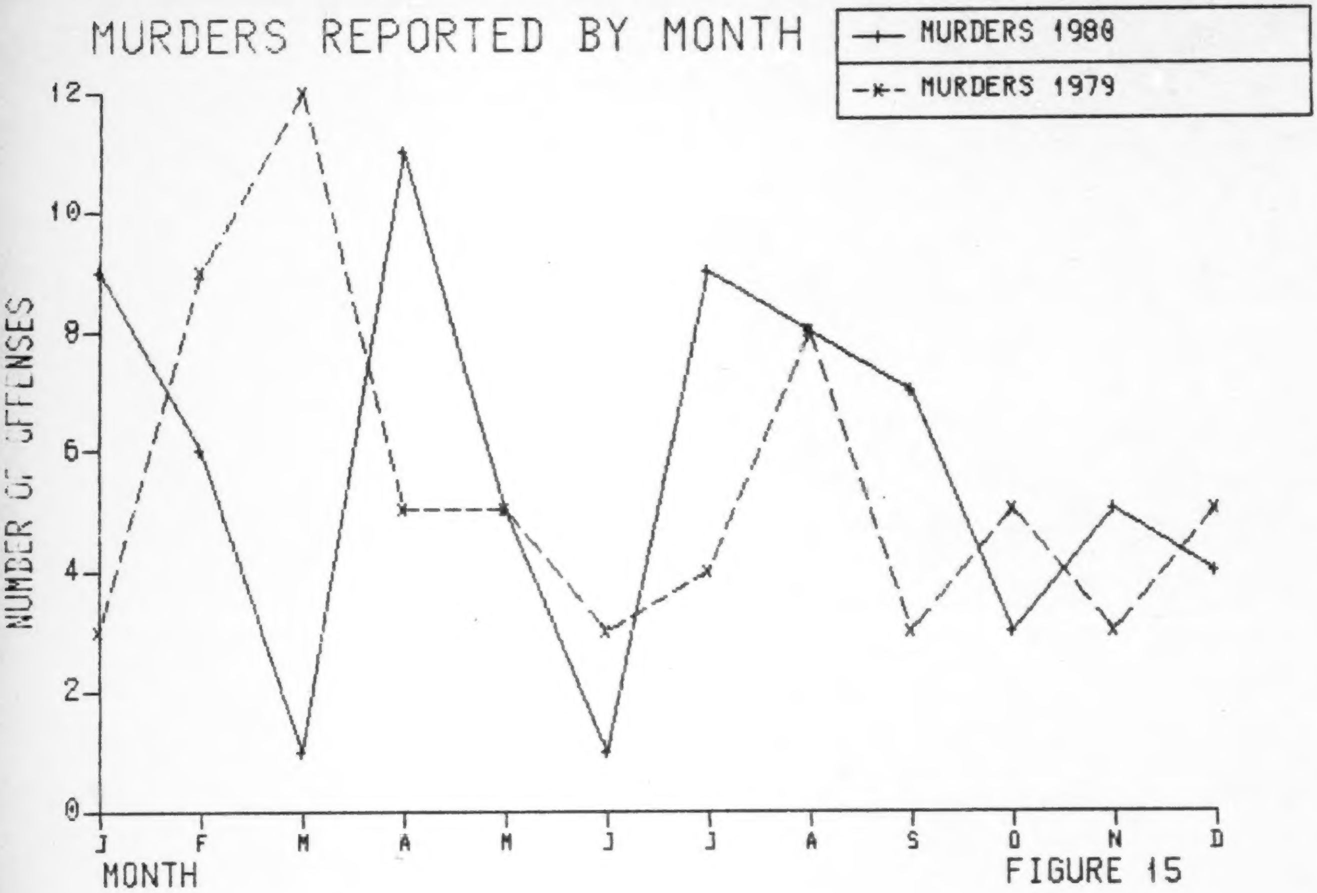


FIGURE 15

D. Murder

There were 69 murders reported to Iowa law enforcement agencies during 1980, an increase of 6.2% from the 65 murders recording during 1979. Figure 15 shows the monthly trend of criminal homicides in Iowa during 1979 and 1980. There are substantial monthly variations apparent in both trend lines, and these variations are not constant between years. As has been noted in prior years' reports, Iowa's murder rate is generally too low to establish consistent, identifiable trends.

Figures 16, 17, and 18 graphically profile characteristics of the State's 69 murder victims for 1980. The victim age profile is shown in Figure 16. Victims ranged in age from less than one year old to 86. The median age was 27, somewhat younger than in prior years. Otherwise, the age profile for murder victims in 1980 is similar to those for previous years.

Figure 17 breaks down the 69 murder victims for 1980 by sex. It shows that 64% of the victims (44) were males, while 25, or 36% were females. This is a lower precentage of female victims than was reported in 1979 (41.5%), but a larger percentage than had been found in prior years.

Figure 18 shows that 81% of the 1980 murder victims were white, while 17% were black, and one was a Native American. The percentage of murder victims who were white is comparable to earlier years.

The next three figures profile the 53 known murderers from 1980. Figure 19 shows an age profile of these offenders. Thirty-two of the murderers (60.4%) were between the ages of 16 and 30, with the median age being 27. The youngest offender was 15, while the oldest was 60.

Figure 20 shows a classification of the 53 murderers by sex: 91% were males and 9% were females.

The racial composition of the population of known murderers for 1980 is illustrated in Figure 21. According to the data shown there, 64% are white, 32% are black, and 4% Native Americans.

Data on seventy-five relationships between murder victims and their murderers is summarized in Figure 22. Fifteen (20%) of these relationships are unknown.

MURDER: RELATIONSHIP OF VICTIM TO OFFENDER 1980

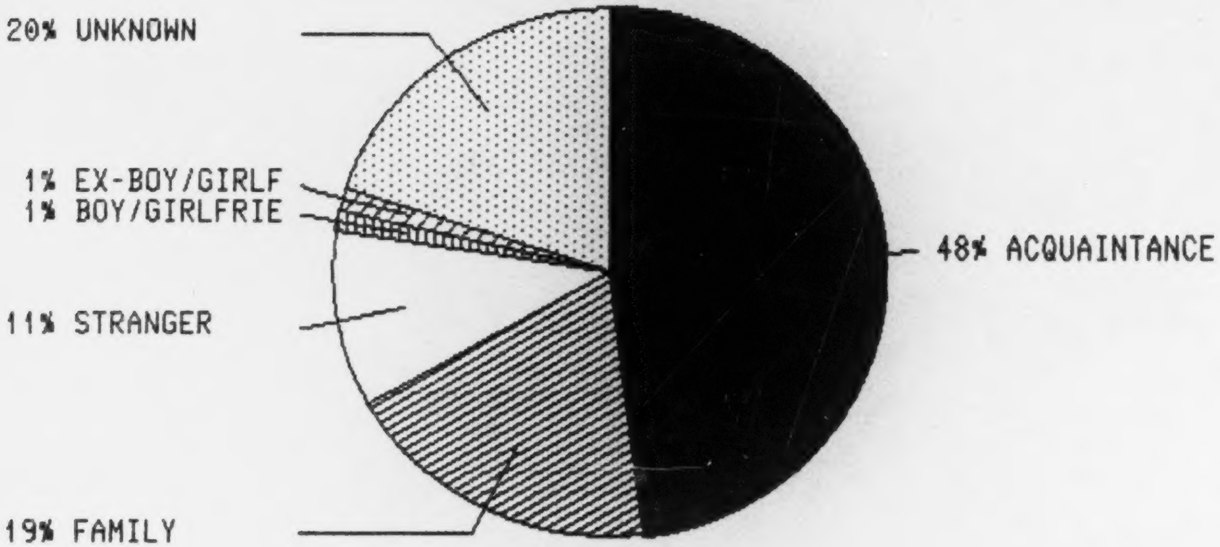

FIGURE 22 N=75

MURDER SITUATIONS 1980

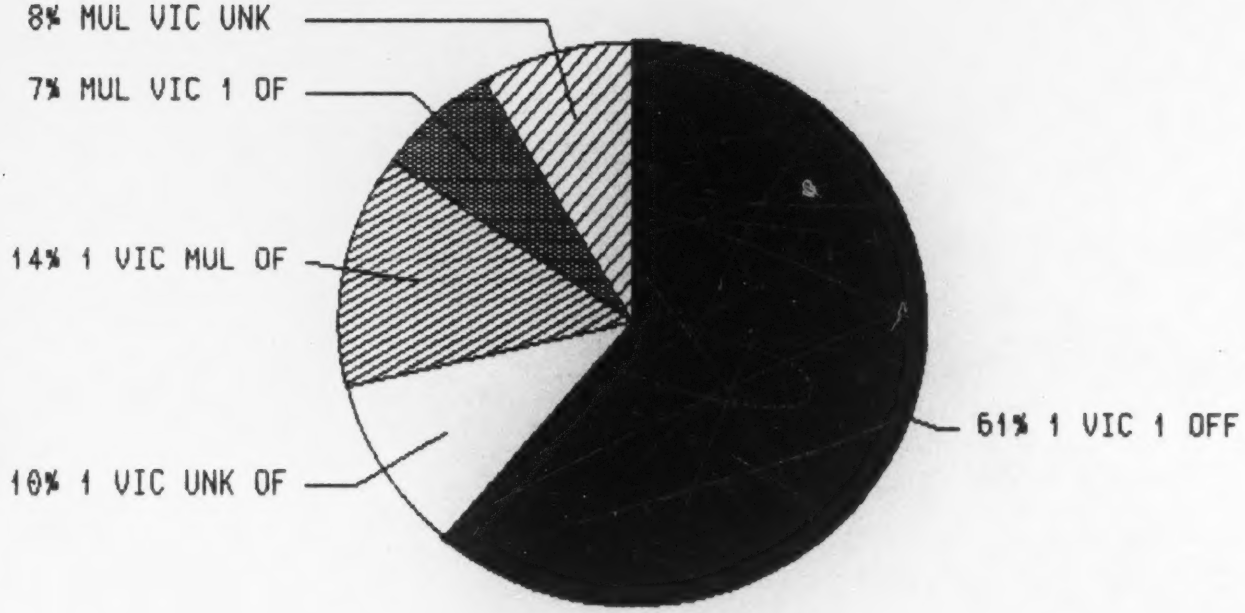

FIGURE 23 N=59

Of the remaining 60, eight (13.3%) involved strangers, while 52 (86.7%) involved victims and offenders who were at least acquainted prior to the murder. In 14 cases, the victim and murderer shared family ties. Two other relationships involved boyfriend/girlfriend or ex-boyfriend/girlfriend connections.

The 59 separate murder incidents reported during 1980 are summarized as to the situation (number of victims and offenders) in which the murder or murders took place in Figure 23. As in past years, most such incidents included one victim and one offender. Thirty-six (61%) of the 59 incidents fell into this category. Multiple offenders attacking a single victim characterized eight (13.6%) of the recorded unknown number of offenders, five involved multiple victims and unknown offenders, and four involved multiple victims and a single offender.

Figure 24 displays data on the areas in which murder victims were discovered in Iowa during 1980. Just over half (35 or 50.7%) were found in the State's metropolitan areas, while the State's other (non-metropolitan) cities and rural areas each accounted for 17 (24.7%) apiece.

Figure 25 gives information on weapons used in committing murder in Iowa during 1980. Firearms were used in 37 of the 69 murders (53.6%), of which 22 (31.9%) involved handguns, eight (11.6%) involved shotguns, four (5.8%) involved rifles, and three (4.3%) involved unknown firearms. Knives and other cutting instruments were used in 13 of the homicides (18.8%), while blunt instruments were used twice (2.9%). "Personal" weapons (hands, fists, feet) were used in seven (10.1%) of the 69 murders. Other identifiable weapons were used six times and the weapons were not identified in four cases.

FIGURE 25 N=69

MURDER CIRCUMSTANCES 1980

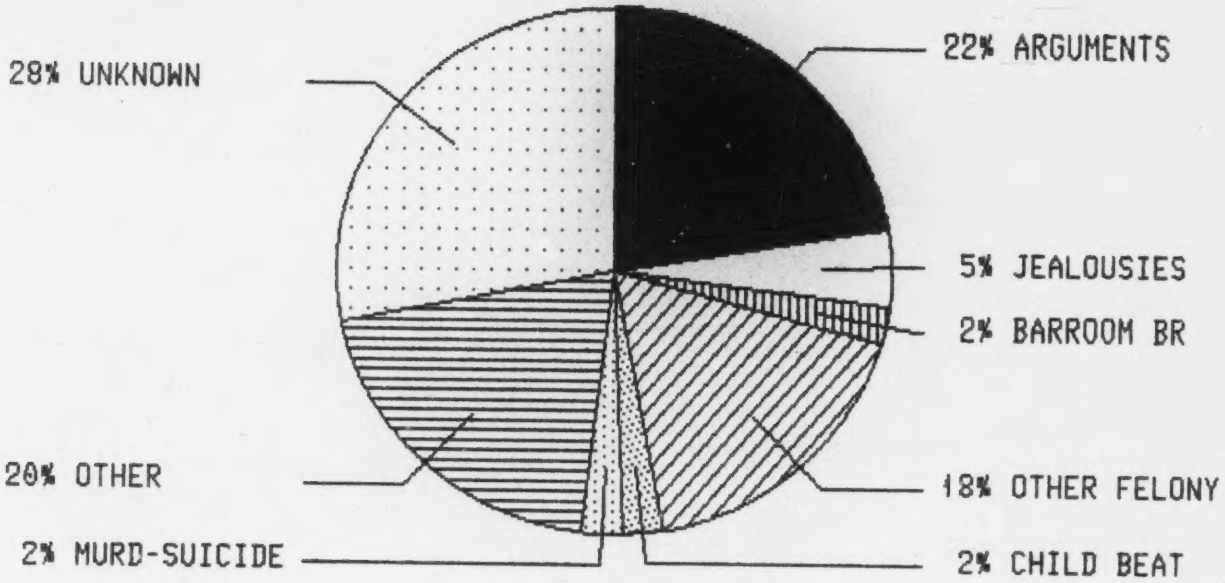

FIGURE 26 N=69

Finally, Figure 26 presents a summary breakdown of the circumstances surrounding the 69 Iowa murders during 1980. Twenty-five involved various types of personal agruments or disputes, including four jealousies or lovers' triangles, two barroom brawls, and 19 classified under the general category of argument. These 25 made up 36.2% of the total of 69 Iowa murders. Another 15 of the homicides occurred during the commission of another felony. Twenty-four of Iowa's 1980 murders occurred under unknown circumstances.

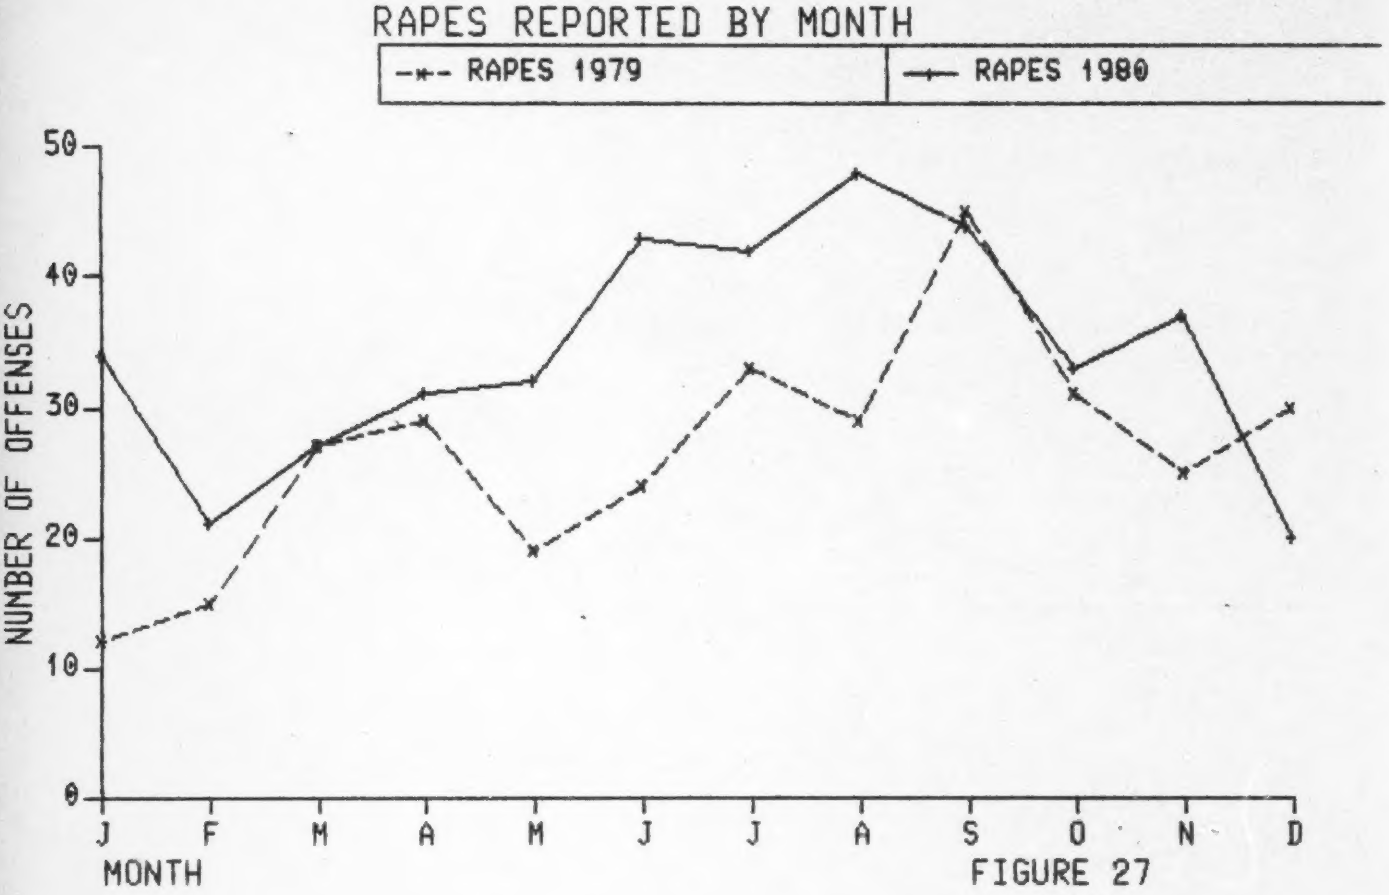

FIGURE 27

E. Rape

Monthly patterns of reported forcible rape for 1979 and 1980 are shown in Figure 27. While there are some similarities in the patterns for the two years, there are also some notable differences. In particular, reported rape increased more noticeably in the summer, warm-weather months in 1980 than had been the case in previous years.

F. Robbery

Monthly robbery trends for 1979 and 1980 are shown in Figure 28. Robbery trends are unusual in comparison with those for other offenses in that they often peak in the cold weather months of January and December. Indeed, the peak month for reported robberies in 1980 was December, followed by January. However, the robbery trend for 1979 peaked in October. There were more reported robberies during most of the months of 1980 than during the corresponding months of 1979. However, there were three exceptions, including October, March, and April.

ROBBERIES REPORTED BY MONTH 1979 AND 1980

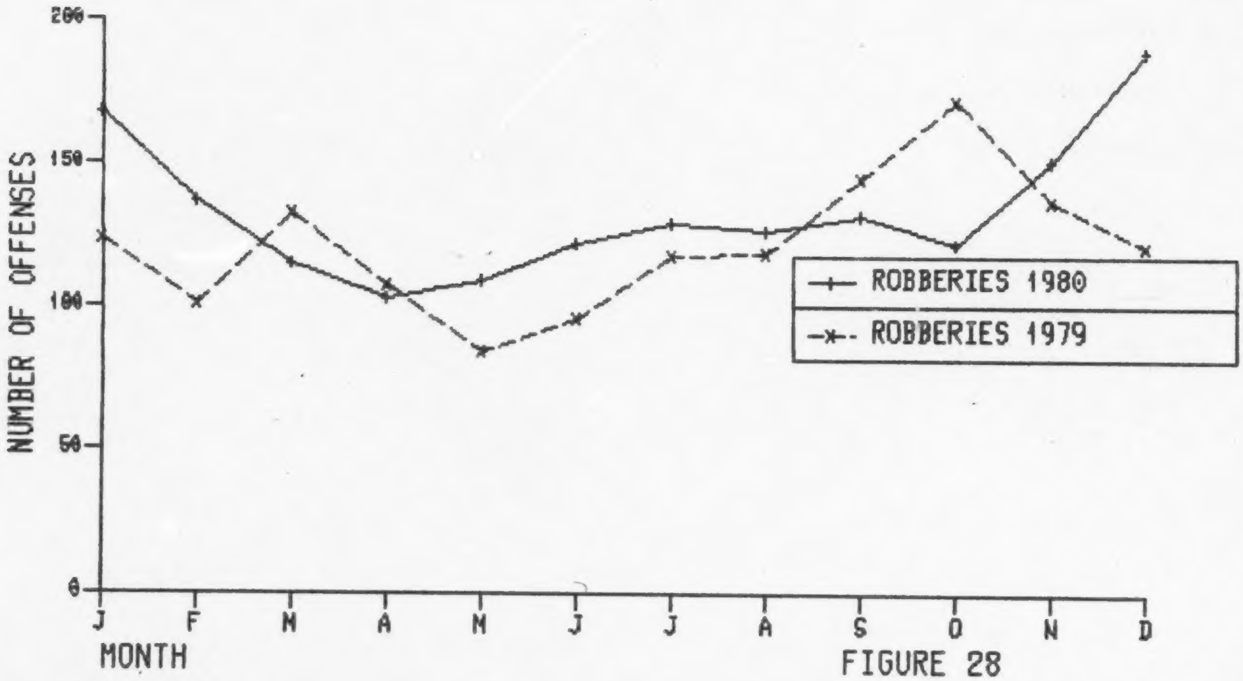

FIGURE 28

The distribution of weapons used in reported robberies is presented in Figure 29. The largest category is firearms; 42% of the 1,605 reported robberies in Iowa during 1980 involved the use of firearms. This is identical to the corresponding percentage for 1980. In fact, the distribution of weapons used in robberies during 1980 was very similar in regard to every category to that of the previous year. This is especially notable in light of the 10.1% increase between 1979 and 1980 in the number of robberies reported in Iowa.

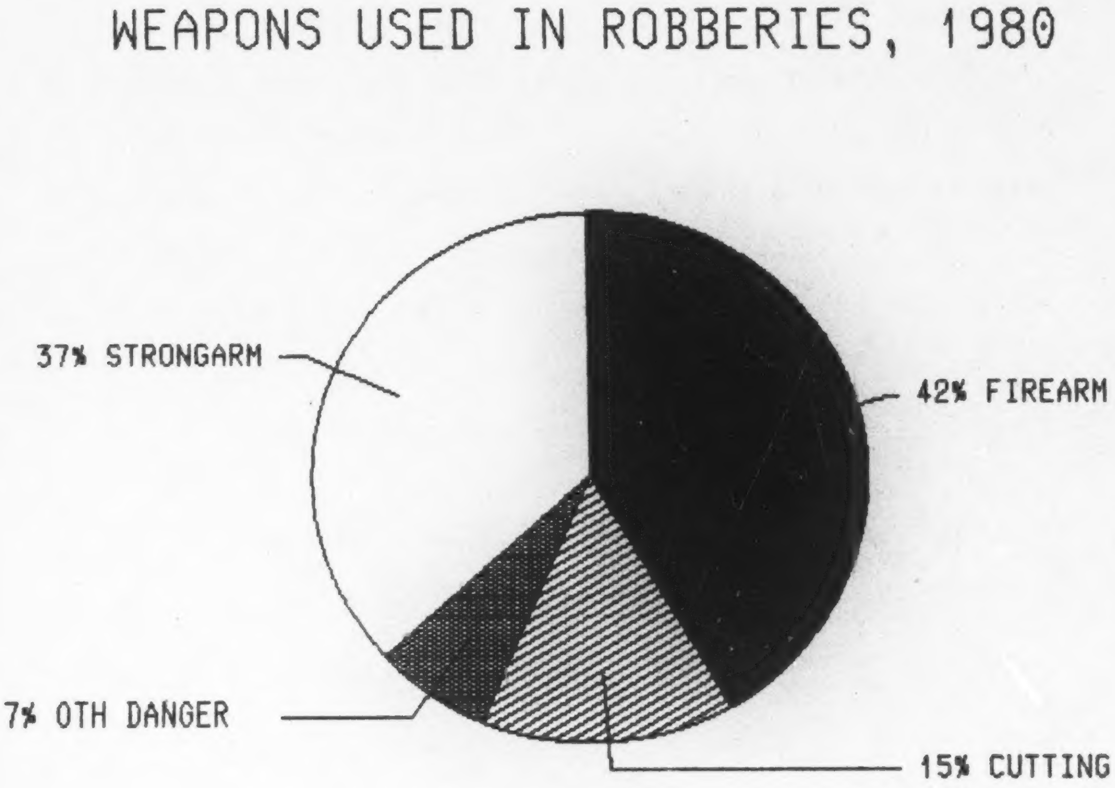

FIGURE 29 N=1605

Figure 30 portrays the distribution of robberies in 1980. Highway robberies were most common, repeating the patterns found in each of the past four years. Robberies from commercial houses (businesses) were next in frequency, followed in order by residential robberies, convenience store robberies, and gas or service station robberies. Bank robberies accounted for only 1.0% of the total robberies reported in Iowa during 1980.

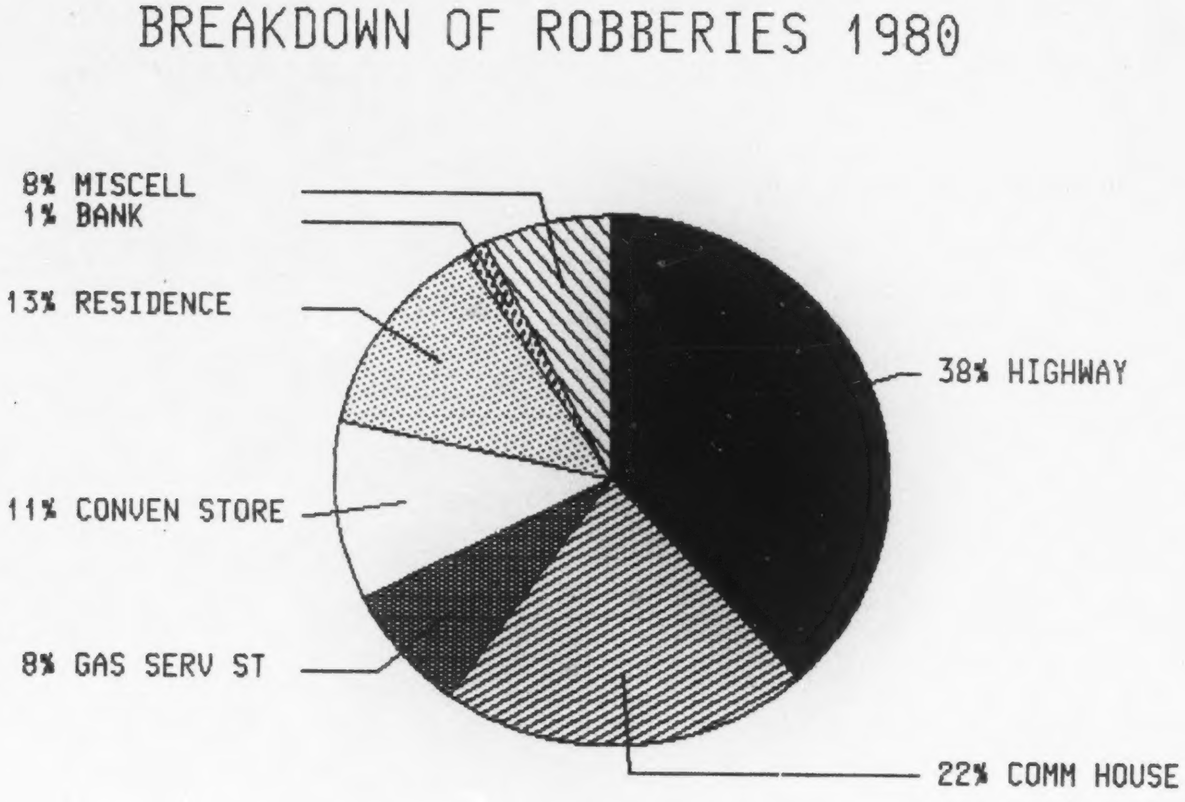

FIGURE 30 N=1605

Dollar losses from robberies reported during 1980 are shown in Figure 31. While robberies from commercial houses made up the largest single category of dollar loss in 1980, the proportion of dollar loss from robberies falling in this category declined sharply from 1979, from 68% of the total, to 28% of the total.

The proportion of dollar loss attributable to highway robberies rose from 9% in 1979 to 26% in 1980, while residential robberies increased from 8% of the 1979 loss to 17% of the loss suffered in 1980.

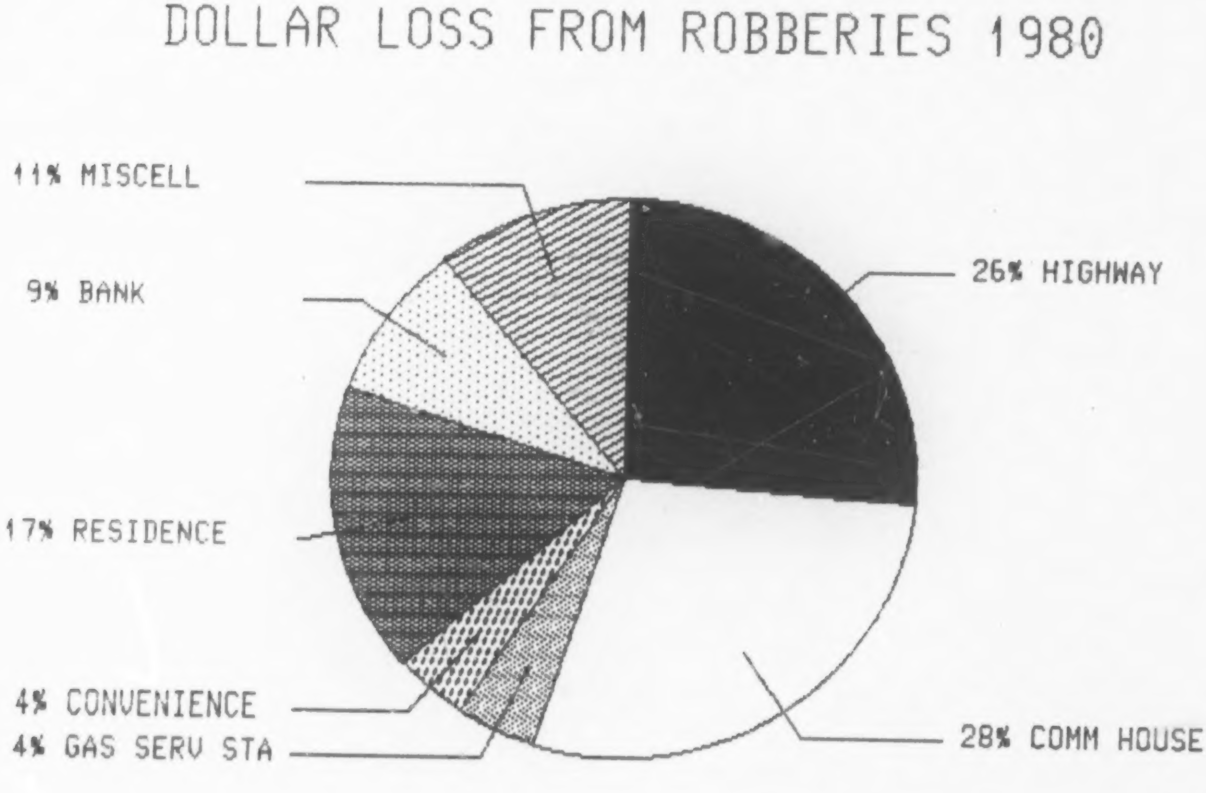

FIGURE 31 TOTAL=$765,001

Table IV breaks down the increase in dollar loss from robbery between 1979 and 1980 by robbery type. Dollar losses from highway robberies showed the largest increase of 139%, while dollar losses from resedential robberies rose 74%. Conversely, dollar losses from commercial house robberies declined 67.5%. Overall, dollar losses from robberies in Iowa declined 21% from 1979 to 1980.

TABLE IV

PERCENT CHANGE IN DOLLAR VALUE AND AVERAGE VALUE OF ROBBERY LOSS 1979-1980, BY TYPE

				Average Dollar Loss		
Type	1979	1980	Percent Change	1979	1980	Percent Change
Highway	$ 84,423	$201,782	+139.0	$ 171	$ 329	+ 92.4
Commercial	664,111	215,990	- 67.5	2,056	624	- 69.6
Gas Station	30,823	34,150	+ 10.8	243	282	+ 16.0
Convenience Store	29,871	31,890	+ 6.8	129	182	+41.1
Residence	73,788	128,356	+ 74.0	476	623	+ 30.9
Bank	43,505	69,667	+ 60.1	2,719	3,167	+ 16.5
Miscellaneous	45,612	83,166	+ 82.3	411	687	+ 67.2
Total	$972,043	$765,001	- 21.2	$ 667	$ 477	- 28.5

Table IV also presents data on average dollar loss by type of robbery for 1979 and 1980. The average dollar loss from highway robberies rose by 92%. Other categories showing increases in average dollar loss were gas station robberies (16%), residential robberies (31%), convenience store robberies (41%), bank robberies (16.5%), and miscellaneous robberies (67%). The average dollar loss from commercial house robberies dropped 70% and the average loss from all robberies dropped 29%.

AGGRAVATED ASSAULT BY MONTH 1979 AND 1980

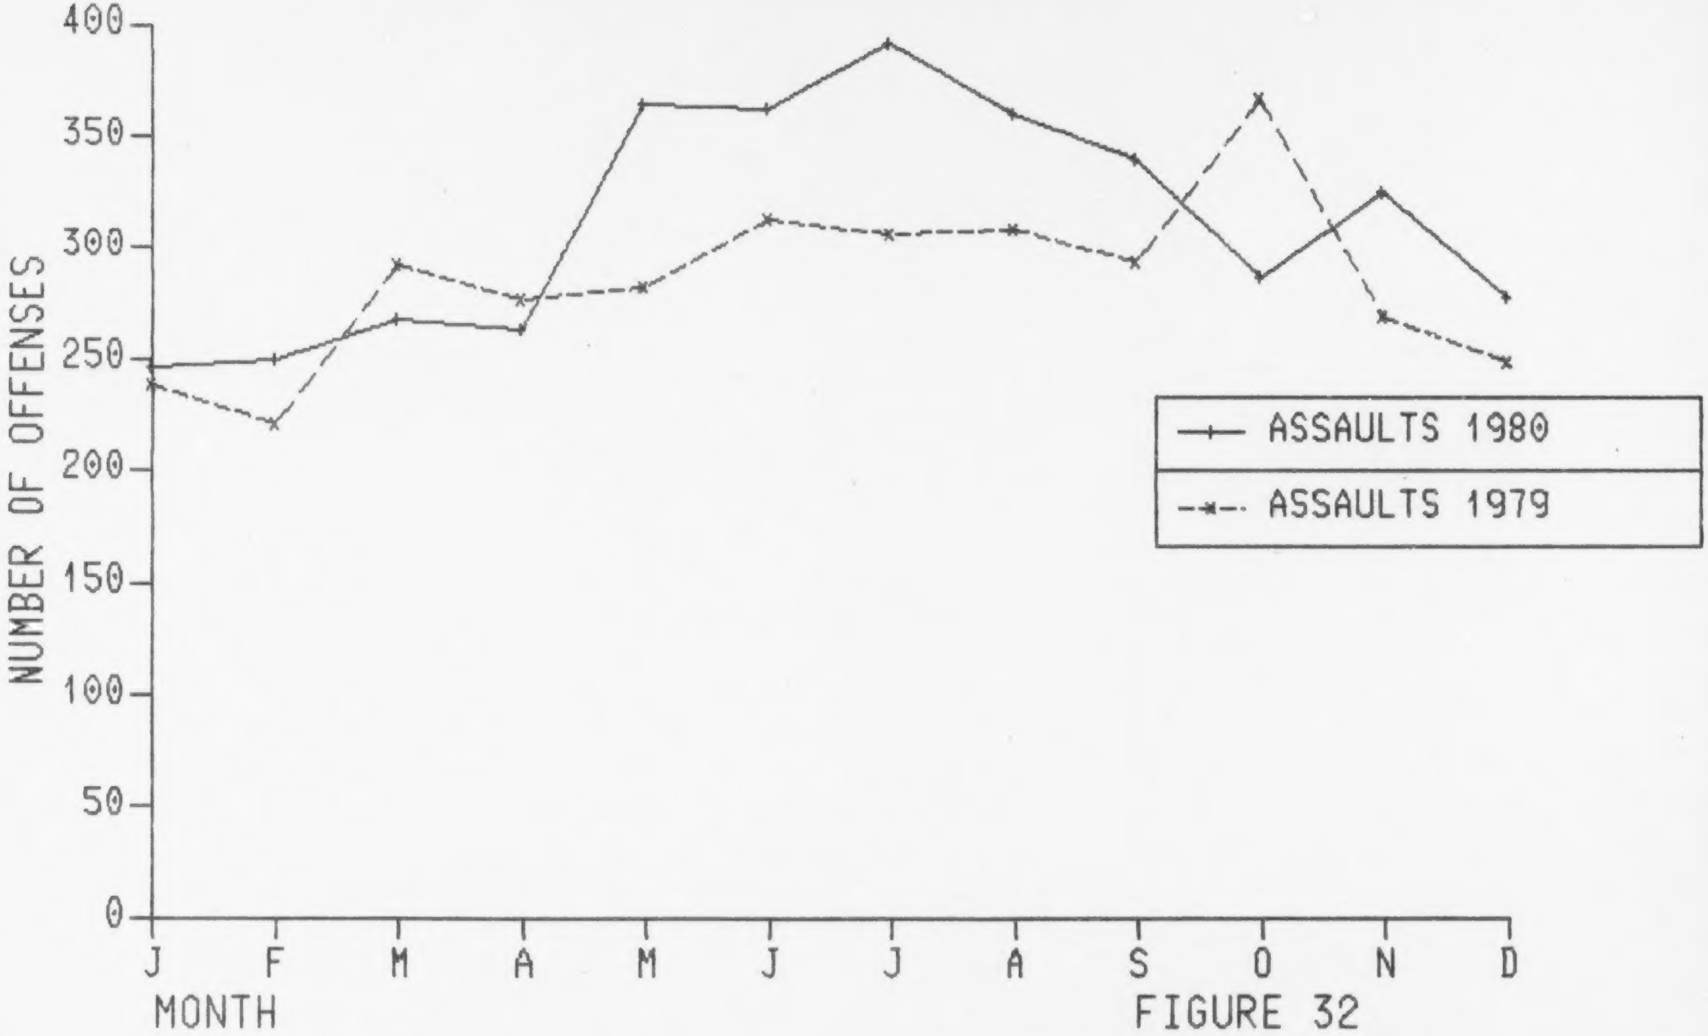

FIGURE 32

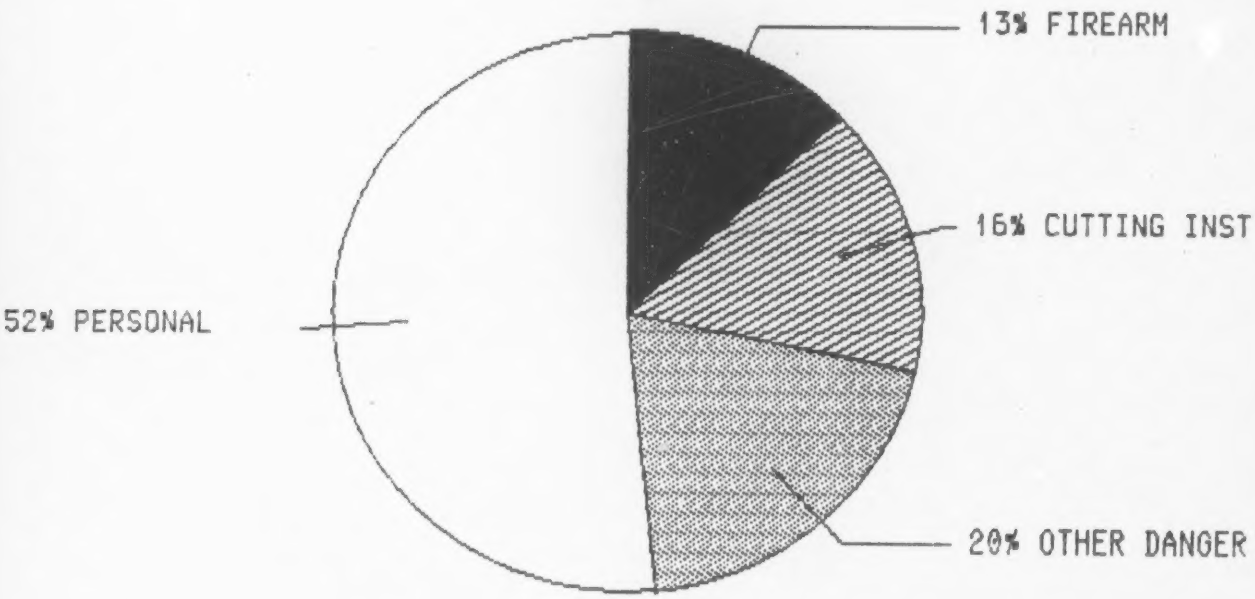
G. Aggravated Assault

Figure 32 depicts the monthly trend of aggravated assaults reported during 1979 and 1980. In 1980, assaults peaked in the warm summer months, a pattern which had been evident in years prior to 1979, when October was the peak month of assaults.

Weapons used in aggravated assaults are shown in Figure 33. Personal weapons (hands, feet, fists) were the most common (52%), which is consistent with prior years. Firearms were used in 13% of the aggravated assaults reported during 1980, knives and other cutting instruments were employed 13% of the time, and other dangerous weapons in 20% of the assaults.



WEAPONS USED IN AGGRAVATED ASSAULTS 1980

FIGURE 33 N=3,736

BURGLARIES BY MONTH 1979 AND 1980

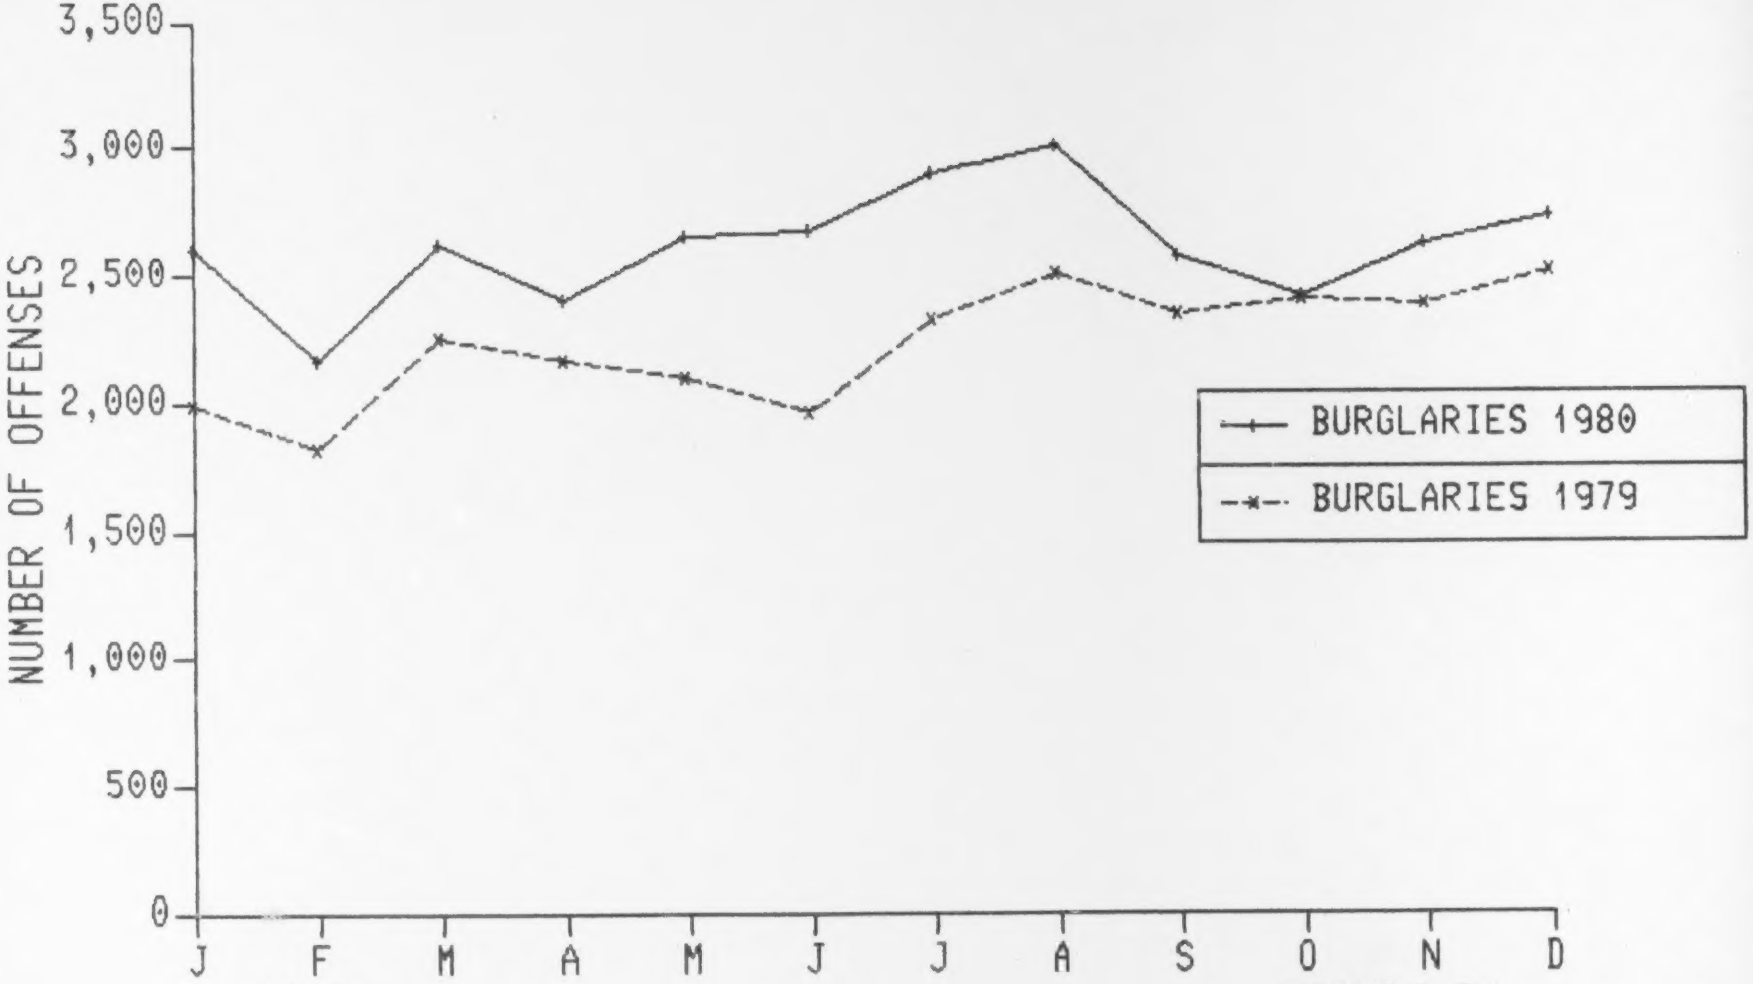


FIGURE 34

H. Burglary

Monthly burglary offense trends for 1979 and 1980 are displayed in Figure 34. The two years' trends are similar, although burglary peaked during the summer months of 1980, and later in the year in 1979.

Figure 35 presents a breakdown of burglaries during 1980 by residential versus non-residential and time of day. Most common were nighttime burglaries of non-residences (28%). Night was also the most common time for household burglaries (26% of the total). Non-residential daytime burglaries are especially infrequent, a pattern that has held consistently over several years.

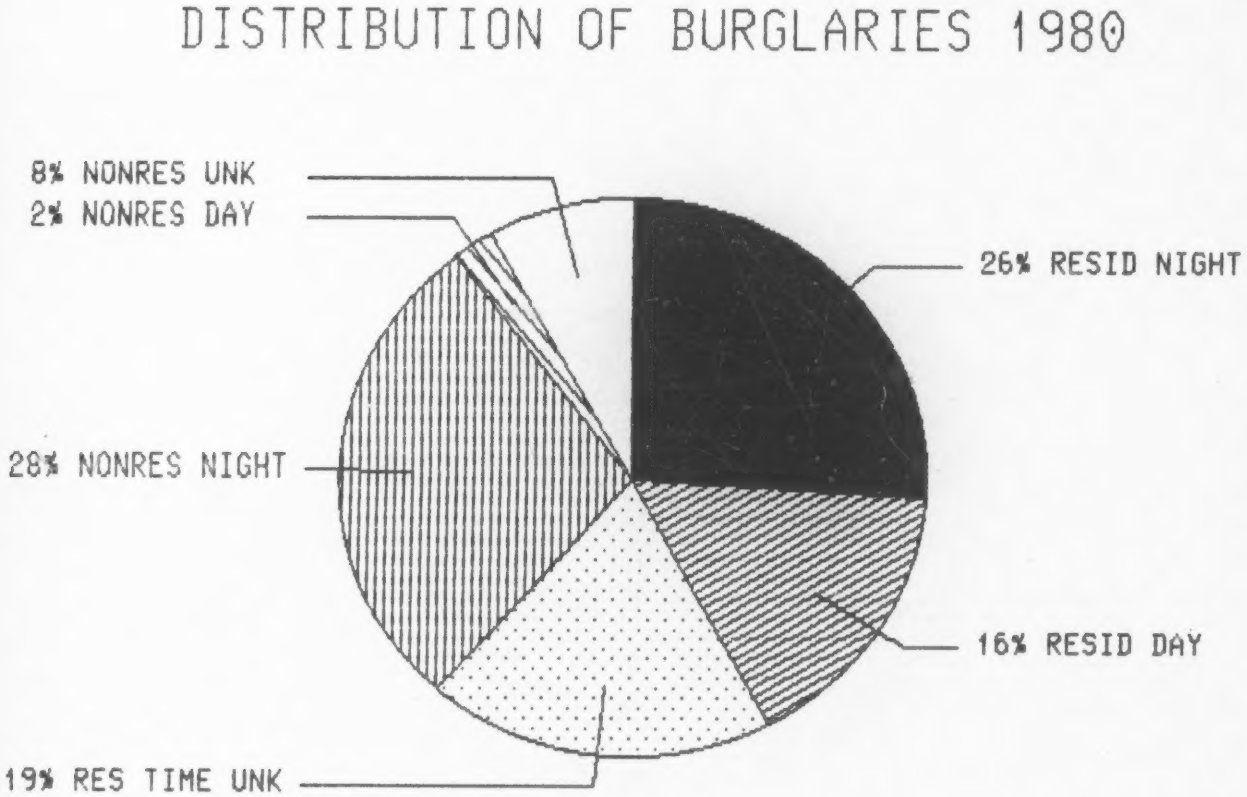

FIGURE 35 N=31,342

DOLLAR LOSS FROM BURGLARIES 1980

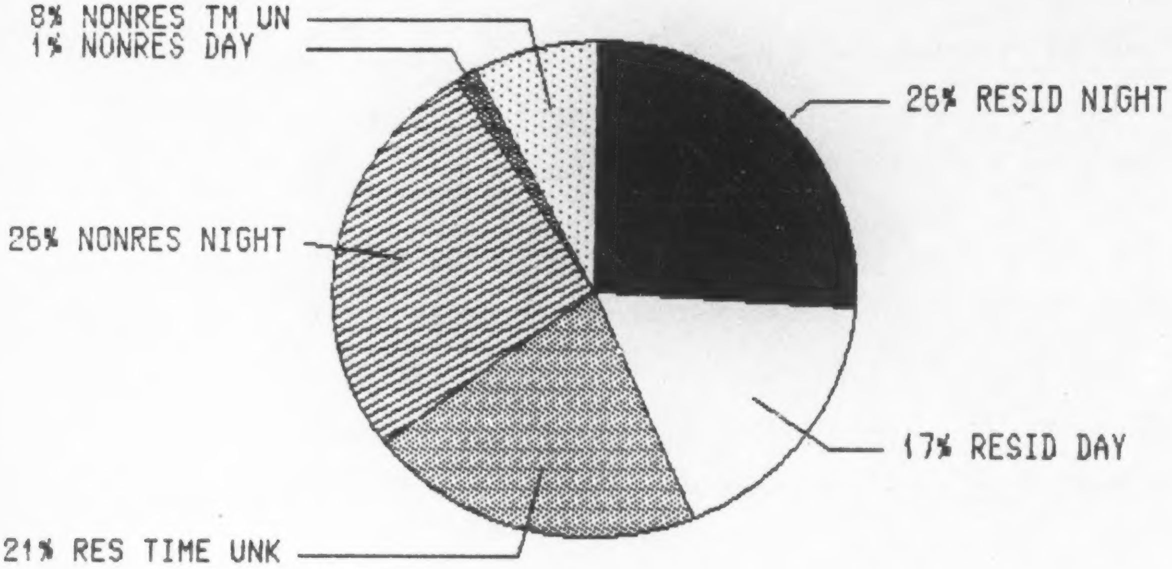

FIGURE 36 TOTAL=$15,420,276

BURGLARY: TYPES OF ENTRY 1980

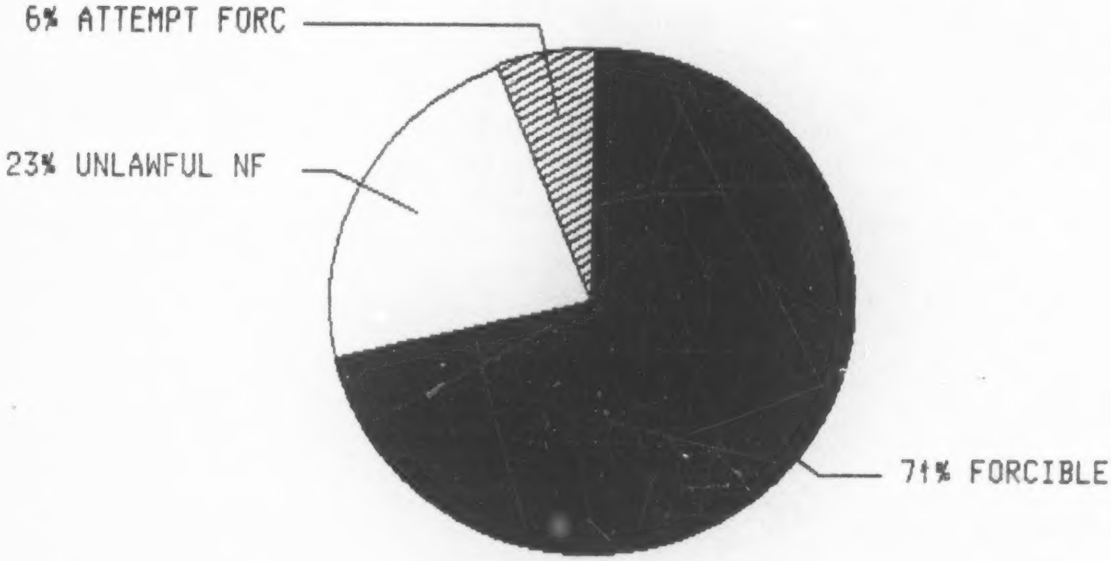

FIGURE 37 N=31,342

Figure 36 shows the same breakdown, but for dollar losses rather than for frequency of burglaries. Nighttime non-residential burglaries accounted for 26% of the total burglary loss during 1980 of $15.4 million. Another 26% of the loss came from residential burglaries committed during the night. While residential burglaries committed during the day accounted for 17% of the total burglary property dollar loss, daytime burglaries of non-residences made up only 1% of this total loss.

Types of entry used in reported burglaries during 1980 are shown in Figure 37. Over two-thirds of all reported burglaries (71%) involved forcible entry, with another 23% involving unlawful, but not forcible, entries.

I. Larcenies

Figure 38 illustrates the monthly trend of reported larcenies in Iowa during 1979 and 1980. The patterns are very similar for the two years, with the annual increase in reported larcenies between 1979 and 1980 being reflected in every month except August. These patterns are also similar to those shown earlier for both total index crime and for property index crime. This is expected in view of the fact that larceny accounted for 68% of all reported index crime during 1980 in Iowa.

FIGURE 38

DISTRIBUTION OF LARCENIES 1980

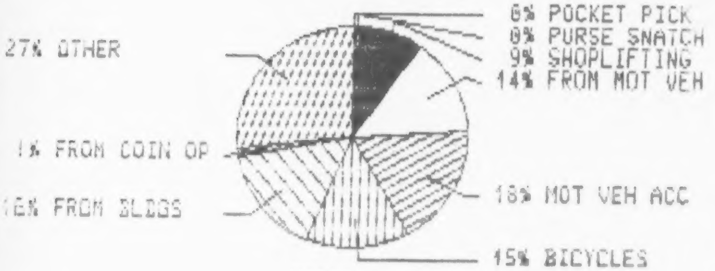

FIGURE 39

N=93,422

DOLLAR LOSS FROM LARCENY 1980

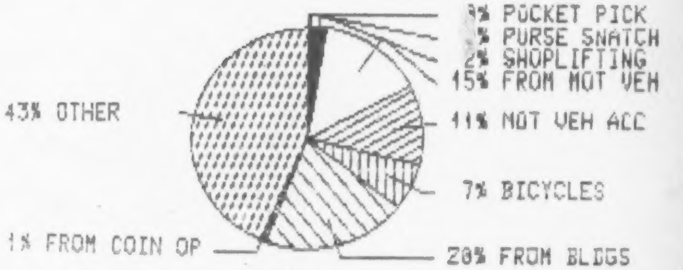

FIGURE 40

TOTAL=$19,554,477

Figure 39 depicts the distribution of larcenies for 1980. This breakdown is generally similar to that found in 1979. Thefts of motor vehicle accessories accounted for 18% of the total reported larcenies during 1980, while thefts from motor vehicles made up another 14% of the total. Sixteen percent of the larcenies were thefts from buildings, while 15% were thefts of bicycles. Shoplifting accounted for another 9%.

Tables V and VI provide further information on the types of larcenies reported in Iowa during the past few years. Table V presents a percentage breakdown of larcenies by type for the years 1976 through 1980. The data show that only minor changes have occurred in this percentage breakdown since 1976. An exception to this pattern is the growth of the "other" cagetory, which has gone from about one-sixth of total larcenies to over one-fourth of the total in the time period covered by the data. Meanwhile, some decline has occurred in the proportion of total larcenies falling in the "auto-related" categories and in the percentage of larcenies falling in the "thefts from buildings" category.

Table VI shows raw numbers of occurrences of larceny, by type, from 1976 through 1980. The sharpest percentage increases in the time shown have been in the "other" classification (+84.9%) and in shoplifting (+38.1%). Additionally, there have been increases in bicycle thefts (+6.8%), thefts from coin machines (+4.3%), and in thefts of auto accessories (+2.3%). Decreases have taken place in pocket-picking (-0.8%), purse-snatching (-10.1%), and in thefts from buildings (-8.6%).

Dollar losses from larcenies, by type, during 1980 are depicted in Figure 40. The "other" category accounted for 43% of the total dollar loss from larcenies reported during 1980. The two categories of "auto-related" larcenies accounted for another 26% of the total, while larcenies from buildings made up 20% of the total dollar loss.

TABLE V

DISTRIBUTION OF IOWA LARCENY, IN PERCENT 1976-1980

	1980	1979	1978	1977	1976

MOTOR VEHICLE THEFTS BY MONTH 1979 AND 1980

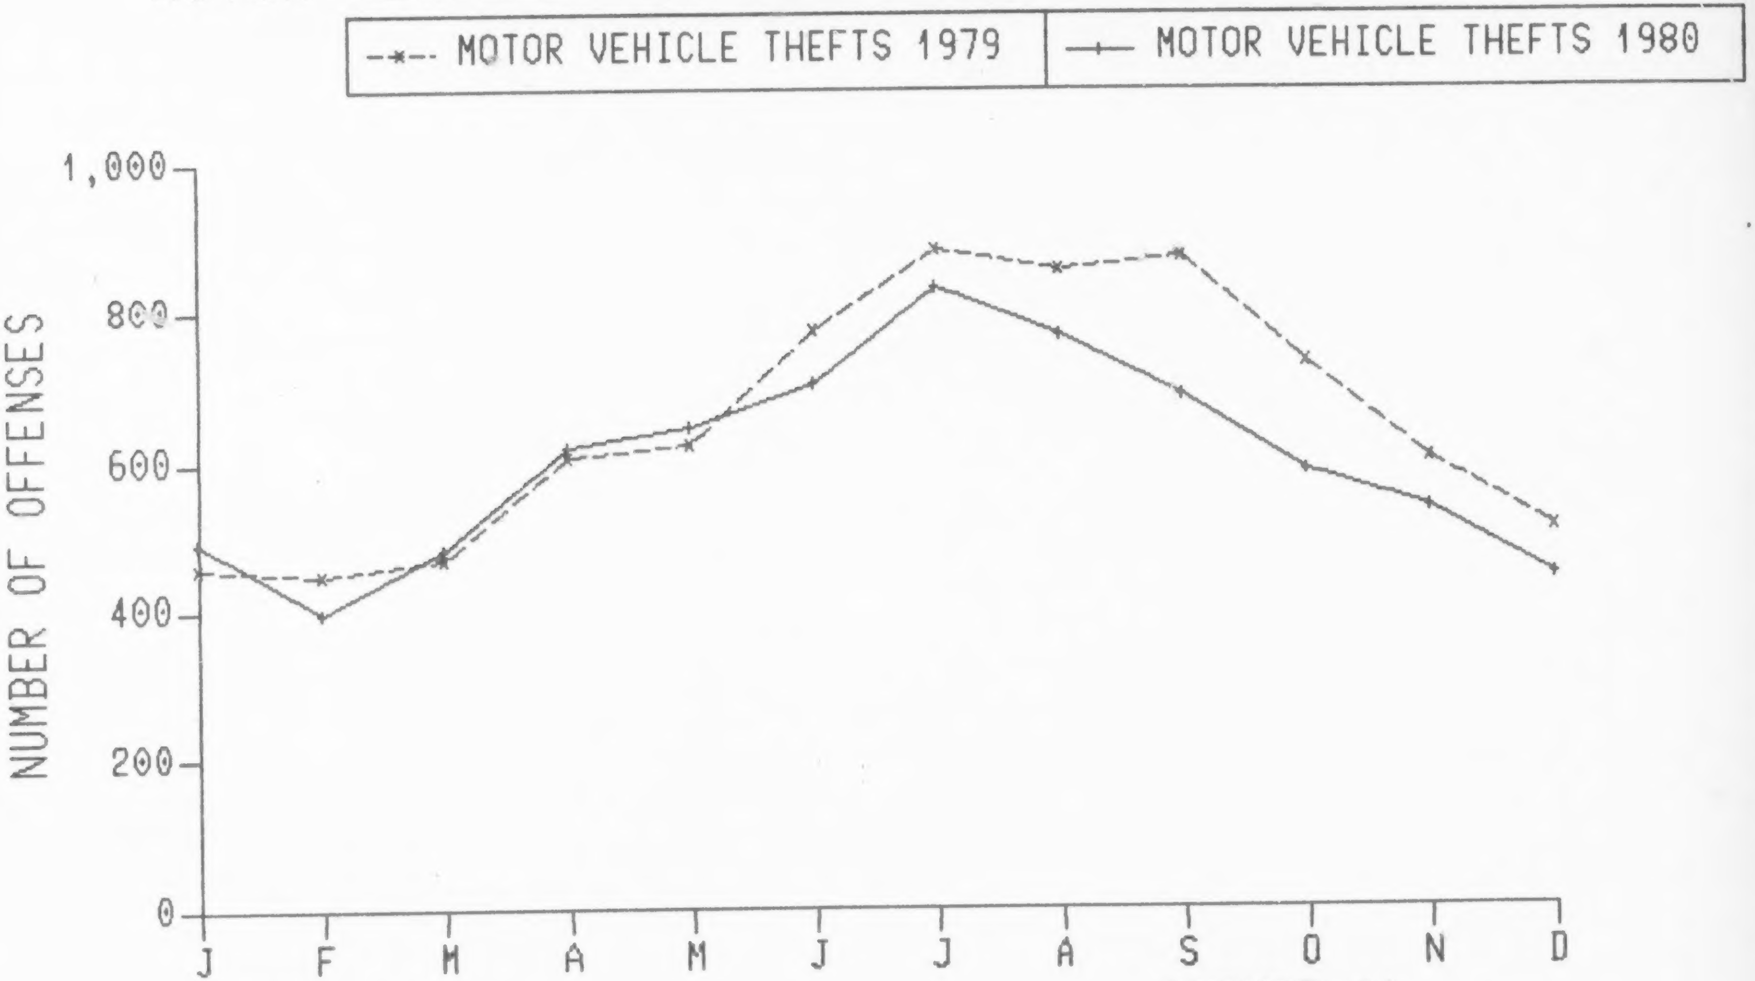

FIGURE 41

J. Motor Vehicle Theft

The monthly figures for motor vehicle thefts during 1979 and 1980 are shown in Figure 41. A marked seasonal pattern is apparent with motor vehicle thefts peaking in summer and early fall. This is consistent with findings for each of the past six years, since the commencement of the Iowa Uniform Crime Reporting program.

Figure 42 illustrates the distribution of motor vehicles stolen in 1980 by type. As in previous years, automobiles were stolen most frequently, followed by motorcycles, trucks, other vehicles, and buses.

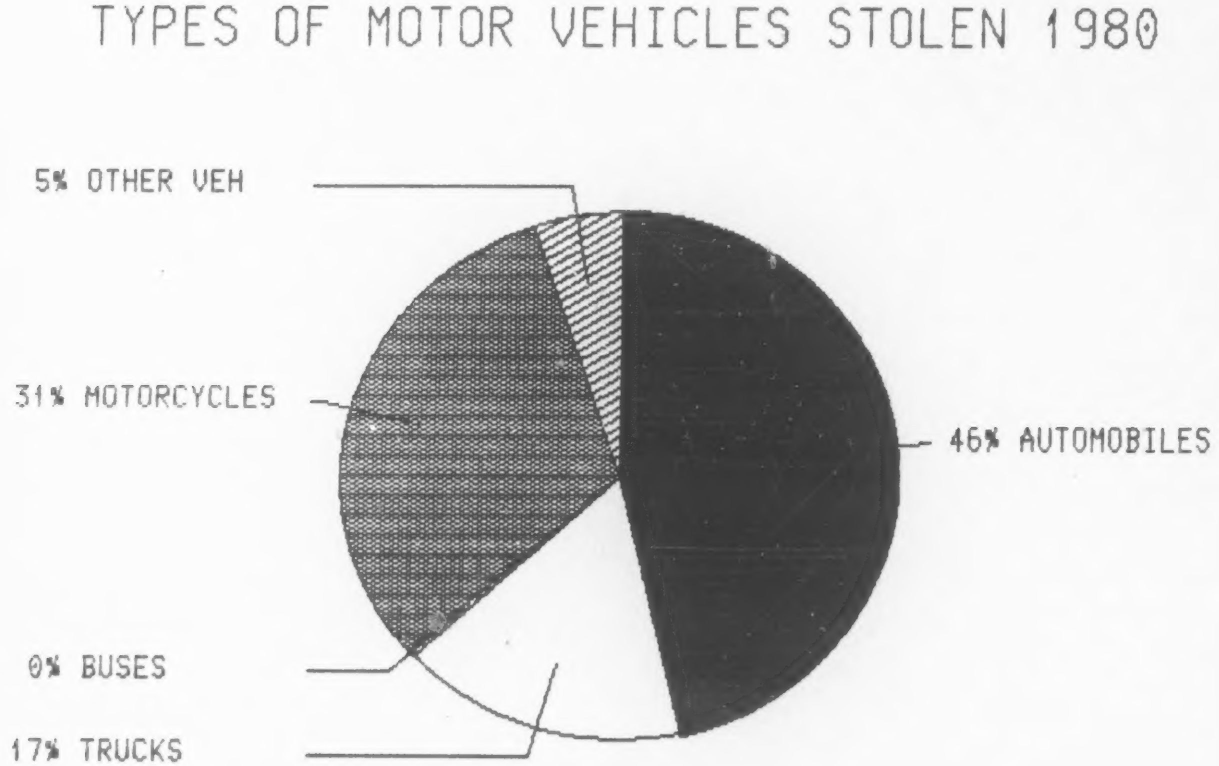

FIGURE 42 N=7,178

TYPES OF MOTOR VEHICLES STOLEN BY MONTH 1980

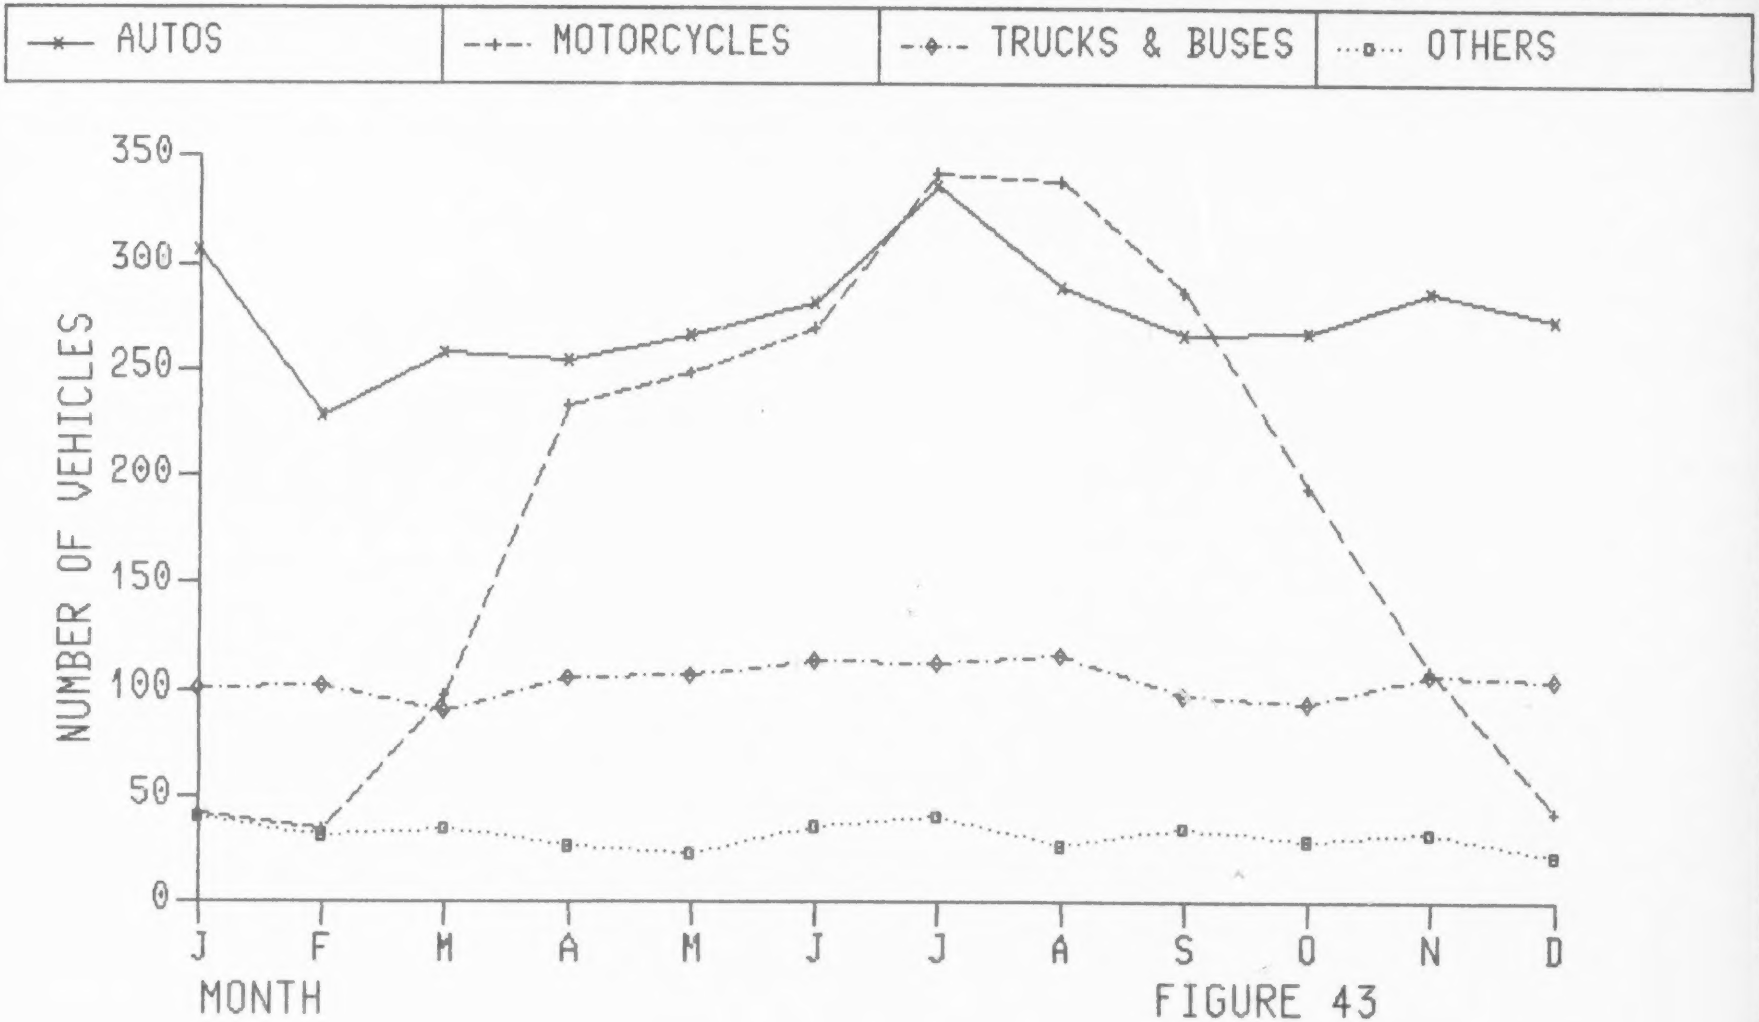

FIGURE 43

Consistent with past years, automobiles made up nearly half of the vehicles stolen in 1980 (46%). The corresponding figure for 1979 was 47%. Motorcycles accounted for 31% of the reported motor vehicle thefts in 1980, the same as in 1979.

Figure 43 casts additional light on the data contained in the previous two figures. It shows the monthly trend in the number of vehicles reported stolen in Iowa during 1980, broken down by type of vehicle. The most noteworthy aspect of this data is the seasonal variation in thefts of motorcycles. Motorcycle thefts are much more prevalent in the warmer months of the year than at other times. In fact, motorcycle thefts exceeded automobile thefts in July, August, and September. This is a pattern which has occurred for several consecutive years now. It should also be noted that a large portion of the total seasonal variation in motor vehicle thefts noted in Figure 41 is attributable to motorcycle thefts. Also noteworthy is the lack of any significant monthly or seasonal variation in thefts of trucks and buses and of "other vehicles".

III. Rate of Change, by Population Category

Tables VII and VIII contain additional presentations of percentage change data for Standard Metropolitan Statistical Areas, non-suburban cities (also referred to in Uniform Crime Reports as "Other Cities"), and rural areas. Table VII presents the raw number of offenses and the crime rates for each of these areas for the total crime index, violent crime, and property crime, while Table VIII presents percentage changes during the past five years for each index offense. Table VII, containing percentage change both in the raw number of offenses and in offense rate, illustrates how population shifts can affect crime data. In the urban areas, populations have risen in Iowa since 1976, resulting in raw numerical percentage increase which is slightly larger than the rate increase. In rural areas, the opposite is true.

In the total crime index category, SMSAs have experienced the largest percentage increases in both raw crime counts and the total crime rate since 1976. All types of areas in Iowa have experienced increases in their index crime rates since 1976.

In the violent crime category, non-suburban cities have shown the largest percentage increases, both in rate and raw number, with SMSAs showing somewhat smaller increases. Violent crime in rural areas was lower in each year since than in 1976.

SMSAs experienced the largest percentage increase in total property crimes since 1976, while non-suburban cities have had the largest percentage increase in the property crime rate. All types of areas in the state have had increases in the property crime rate since 1975.

TABLE VII

TOTAL, VIOLENT, AND PROPERTY CRIME INDEXES BY TYPE AND AREA

TOTAL CRIME INDEX, BY TYPE OF AREA, 1976-1980

IV. National Comparison

Table IX presents index crime and crime rate data for Iowa for each category of index crime for 1971 through 1979, along with the State's national rankings for each category in each year. The national rankings are based on figures published by the FBI, which were not available for 1980 at the time of this writing.

This data are presented to place Iowa's increases in reported crime during the 1970's in a national context. The national rankings shown in the table indicate little change in Iowa's relative position in comparison to other states since the early 1970's. In other words, Iowa's increases in reported crime during the past decade have reflected a national trend.

In five of the seven categories of index crime, Iowa's reported crime rate in 1979 was among the ten lowest of the fifty states. The exceptions were larceny, in which Iowa ranked 26th of the 50 states, and motor vehicle theft, in which Iowa ranked 40th of the 50 states. That is, twenty-four other states had lower larceny rates than did Iowa in 1978, while ten other states had lower rates of motor vehicle theft than did Iowa.

Larceny is the only category of index crime for which Iowa's rate has exceeded the median of the 50 states during the period for which data are shown in the table. Even so, Iowa's larceny rate has remained below the national rate. By way of contrast, Iowa has consistently ranked among the lowest states in the rate of reported violent crime. During the 1970's, no more than six other states had lower rates of violent crime than did Iowa. In six of the 10 years shown, only three other states had lower rates, and in one year (1972), only two other states had lower rates than did Iowa.

V. Arson

As explained earlier, arson was designated a Part I crime by Congressional action in 1979. However, 1980 was the first year in which arson reporting was fully operational in Iowa. While a Part I crime, arson is not included in the index crime figures and rates presented earlier in this report, in order to maintain comparability with past years' data. Since 1980 was the first full year of arson reporting, there are no trend comparisons possible with prior years.

There were 1,368 arsons reported in Iowa during 1980. Thus, arson is detected less frequently in Iowa than most index crimes were reported. In fact, only murder and rape had fewer recorded cases than did arson in 1980. However, there was an estimated property loss of $15,151,873 from arsons in Iowa during 1980. This is much greater than the property loss suffered by Iowans from robbery ($765,001), and is comparable to the loss from burglary ($15,420,276), and to that stemming from motor vehicle theft ($15,032,234). Larceny, at $19,554,477, outdistanced all other categories of reported crime as a source of estimated property loss by Iowans during 1980. However, in terms of the average estimated dollar loss per incident, arson, at $11,076, exceeded all other categories of reported crime. The largest average loss per reported incident of property index crime during 1980 was that for motor vehicle theft, $2,094.

Figure 44 illustrates the number of reported arsons by month during 1980 in Iowa. During the year, there were substantial variations in the monthly totals of arsons reported, with the largest numbers occurring in November and October, respectively. However, one year of data is an insufficient basis from which to reliably project seasonal patterns.

ARSONS REPORTED BY MONTH, 1980

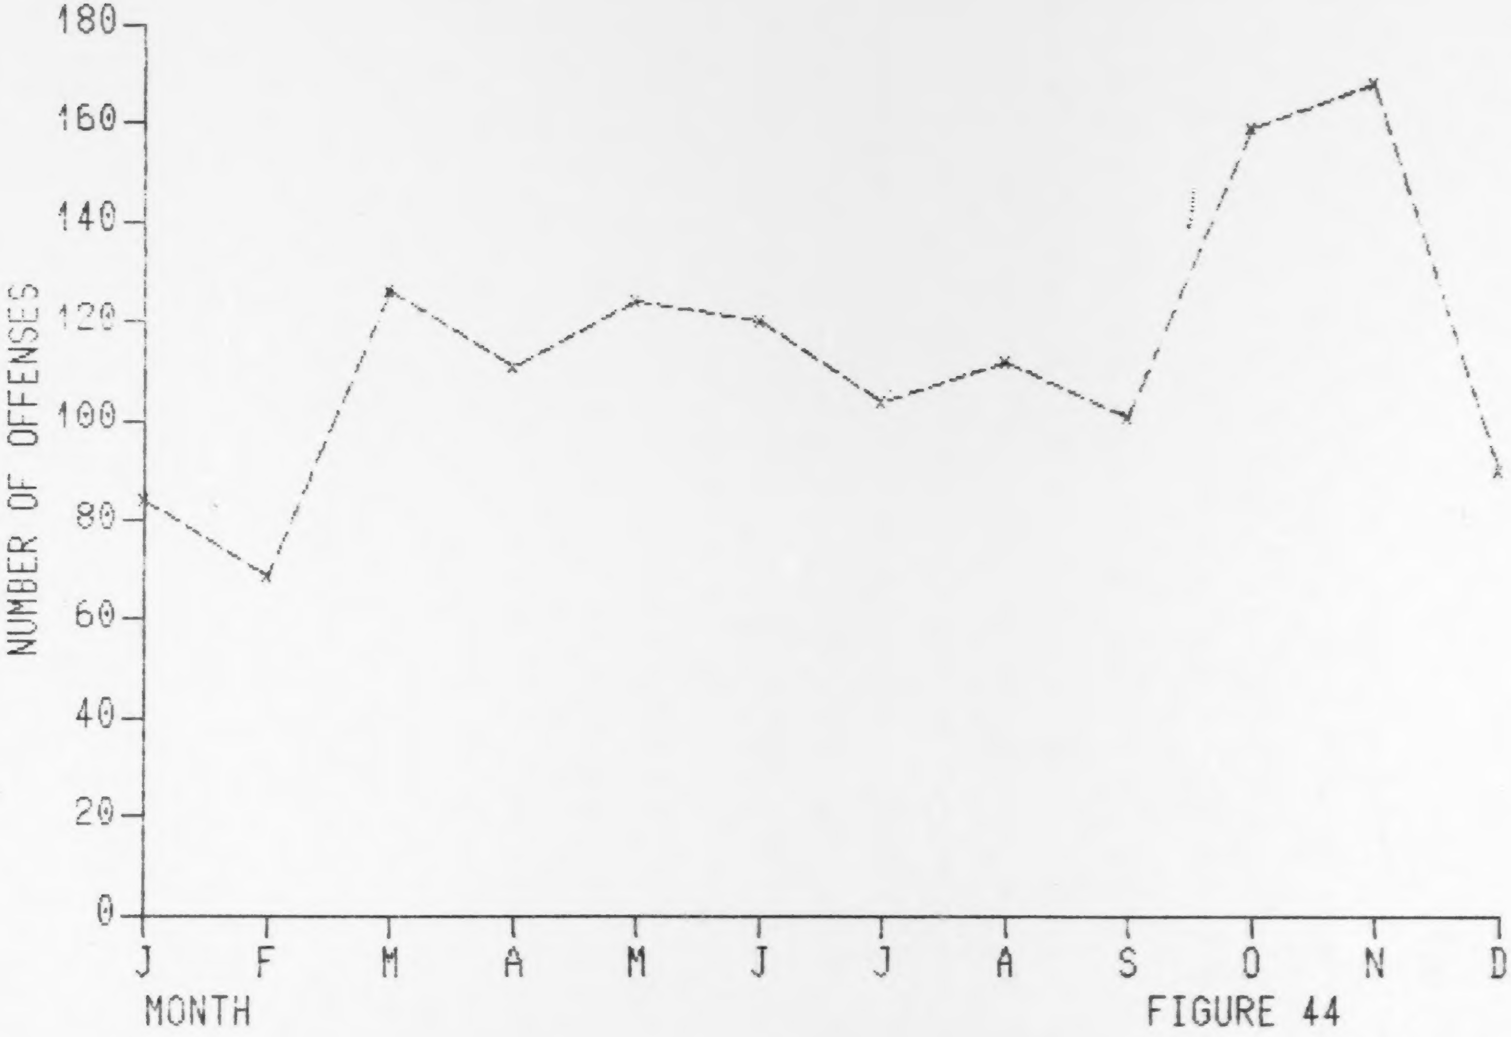

FIGURE 44

ARSONS REPORTED BY TIME OF DAY 1980

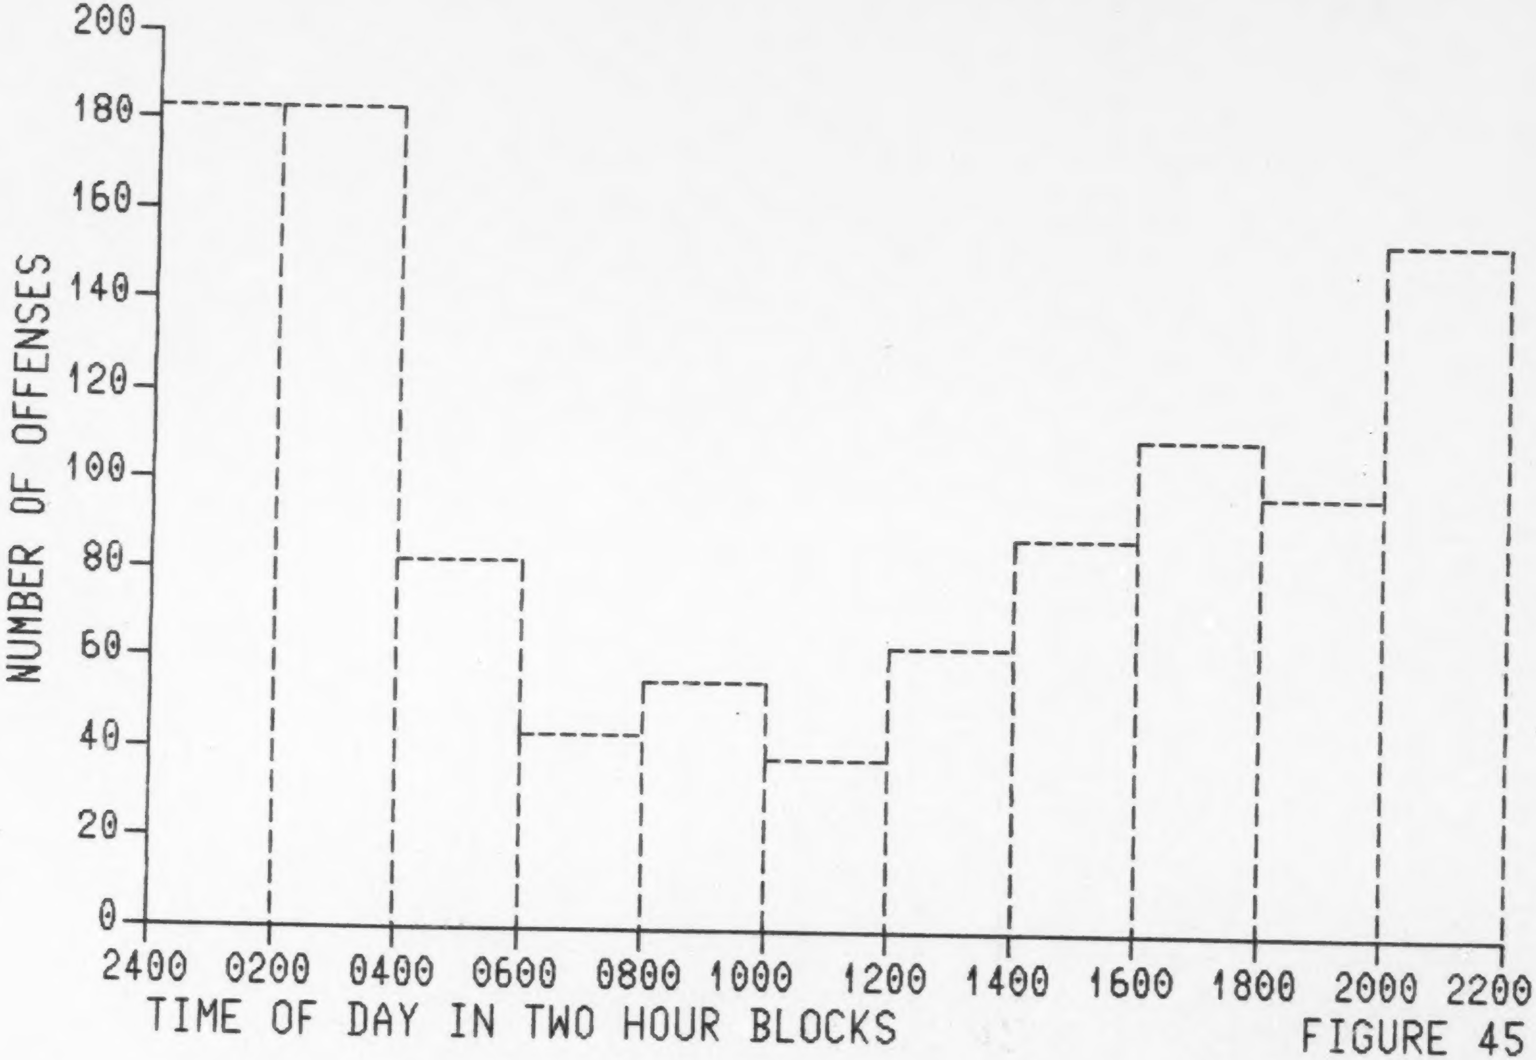

FIGURE 45

The time of day at which reported arsons occurred during 1980 is represented in Figure 45. The time of day is represented in twelve two-hour segments. Most common were arsons occurring between 10:00 p.m. and midnight (198 or 14.5% of the total of 1,368 reported arsons during 1980). Next most common times for the occurrence of arsons were the two-hour segments between midnight and 2:00 a.m. and between 2:00 a.m. and 4:00 a.m. Each of these time periods recorded 183 arsons during 1980. Next in line was the period between 8:00 p.m. and 10:00 p.m., with 155 reported arsons. Taken together, the eight hour period between 8:00 p.m. and 4:00 a.m. accounted for 719 arsons, which is 52.6% of the 1,368 reported in 1980.

Figure 46 breaks down reported arsons in Iowa during 1980 by the type of property involved. Of the 1,368 arsons reported, 893 (65.3%) involved structural properties (buildings) of one sort or another. Another 316 (23.1%) involved mobile property, including motor vehicles, while the remaining 159 (11.6%) arsons involved types of property other than mobile property and buildings. Within the structural property grouping, the largest single number of arsons occurred in single-family dwellings (196 or 14.3% of the total). Taken together, all types of residential property accounted for 397 reported arsons in Iowa during 1980 or 29% of the total reported. Industrial arsons made up the smallest category, 24 or 1.7% of the total of 1,368 reported.

Figure 47 summarizes the estimated dollar value of property lost from arsons in Iowa during 1980, utilizing the same categories as Figure 46. The picture here is somewhat different than that displayed in Figure 46. Industrial arsons, which were the smallest category of reported arson, accounted for the largest amount of property loss, $6,436,860 or 42.7% of the total property loss from arson during 1980 of $15,151,873. Other categories which accounted for $2 million or more in property loss were residential arsons ($3,229,377) and arsons of commercial, other than industrial, buildings ($2,647,552).

VI. Assaults on Law Enforcement Officers

Information on assaults on law enforcement officers in Iowa reported during 1979 and 1980 is presented in Table X. Assaults are broken down into those resulting in injury and those not resulting in injury.

There were 1,136 assaults on peace officers reported in 1980, an increase of 5.4 percent over the 1,078 assaults reported on Iowa law enforcement officers in 1979. There was a 3.4 percent increase in assaults resulting in injuries to the officer in 1980, and a 5.6 percent increase in assaults without injury.

One peace officer was killed in the line of duty in Iowa in 1980. Officer John E. Van Haaften of the Pella Police Department was shot and killed while working undercover with the Knoxville Police Department on April 9, 1980.

* INCLUDES REPORTING POLICE DEPARTMENTS SERVING JURISDICTIONS WITH LESS THAN 50,000 POPULATION AND REPORTING SHERIFFS' OFFICES IN STANDARD METROPOLITAN STATISTICAL AREA COUNTIES (WOODBURY, POTTAWATTAMIE, POLK-WARREN, BLACK HAWK, LINN, DUBUQUE AND SCOTT)

CITIES ARE GROUPED BY POPULATION SIZE CATEGORIES (GROUP A - NOT USED. GROUP B - OVER 50,000.
GROUP C - BETWEEN 25,000 AND 50,000. GROUP D - BETWEEN 10,000 AND 25,000. GROUP E - BETWEEN 5,000 AND 10,000.
GROUP F - LESS THAN 5,000).

SUBURBAN & NON-SUBURBAN POLICE DEPARTMENTS ALSO INCLUDED IN CITY SIZE GROUPS.

THIS TABLE INCLUDES ONLY THOSE AGENCIES WITH 100% REPORTING.

BASED ON 100% REPORTING AGENCIES ONLY.

* INCLUDES REPORTING POLICE DEPARTMENTS SERVING JURISDICTIONS WITH LESS THAN 50,000 POPULATION AND REPORTING SHERIFFS' OFFICES IN STANDARD METROPOLITAN STATISTICAL AREA COUNTIES (WOODBURY, POTTAWATTAMIE, POLK-WARREN, BLACK HAWK, LINN, DUBUQUE AND SCOTT).

SUBURBAN & NON-SUBURBAN POLICE DEPTS ARE ALSO INCLUDED IN CITY SIZE GROUPS.

UNIVERSITY CAMPUS POLICE DEPARTMENTS ARE INCLUDED IN THEIR RESPECTIVE CITY CRIME REPORTS.
